

WebClerk 3 System Flowcharts

Complete architecture diagrams for the WebClerk commerce platform.
Generated 2026-08-11. 15 flowcharts covering all major subsystems.

Table of Contents

- 1. Master Commerce Flow** The complete transaction lifecycle
- 2. Big 4 Transactions** Line quantity flow and pending inventory
- 3. Customer-Centered Sales** Commerce from the customer's perspective
- 4. Order to Invoice** Fulfillment flow with inventory bucket effects
- 5. Payment, Ledger, and GL** Cash receipt through journal posting
- 6. Inventory Buckets** $\text{available} = \text{on_hand} - \text{on_so} + \text{on_po} + \text{on_wo}$
- 7. Action Model** Universal task: who, what, why, when, where, how
- 8. Project Model** Projects connect transactions; linkage connects data
- 9. Contact Model** Central identity; references any record
- 10. Serial Number Tracking** Serial + SerialLog lifecycle
- 11. Print System** Cmd+P primary, Cmd+Opt+P report selector
- 12. QA Entity** Quality inspection, surveys, customer feedback
- 13. Sign-in / Register** Roles: Admin, User, Rep, Vendor, Sales, Customer
- 14. Flight Simulator: Inventory** 9-step training: quantities, pending, GL
- 15. Impact Assessment Loop** Alice guesses, user corrects, Alice learns

Reading Guide

Start with the Master Commerce Flow (#1) for the big picture.

The Big 4 (#2) shows how quantities move between transaction types.

Payment/GL (#5) shows how money flows from customer to the books.

Inventory Buckets (#6) explains on_hand, on_so, on_po, and available.

The Flight Simulator (#14) ties it all together as a 9-step walkthrough.

The Impact Loop (#15) shows how Alice learns from user corrections.

Color conventions:

Blue nodes = no GL impact (quotes, commitments)

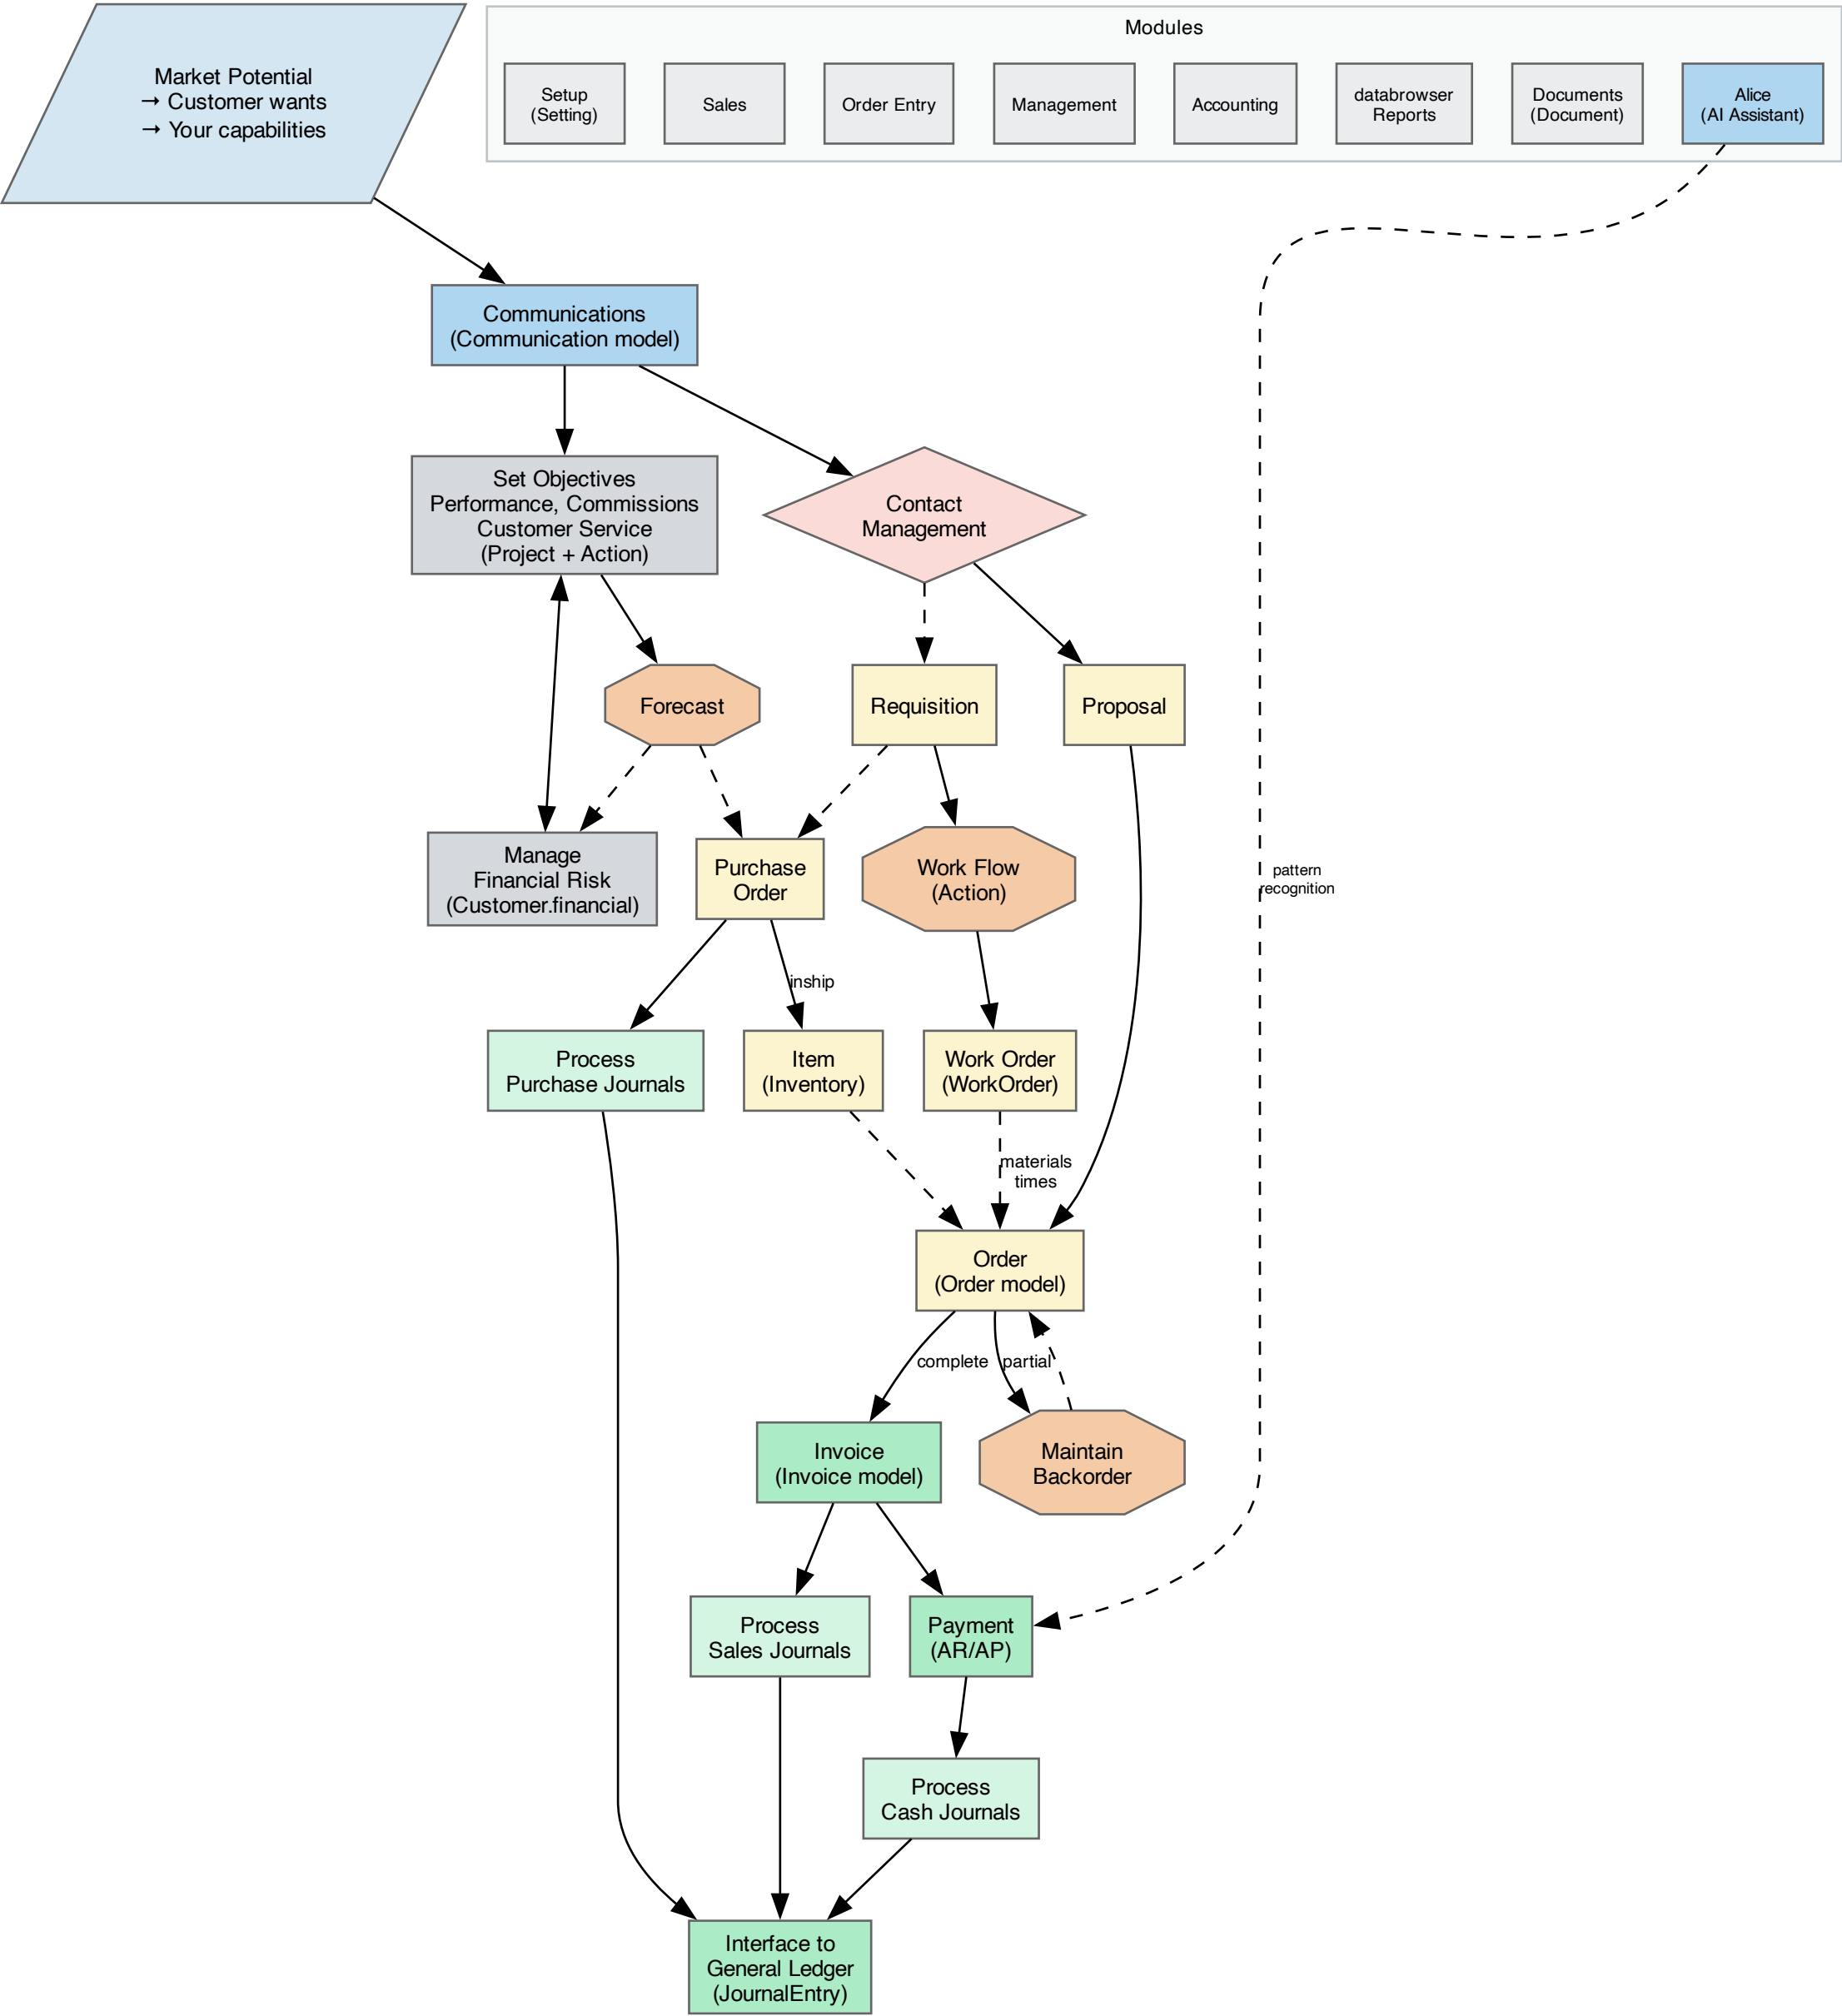

Orange nodes = GL impact (financial events)

Purple dotted lines = pending records (track movement)

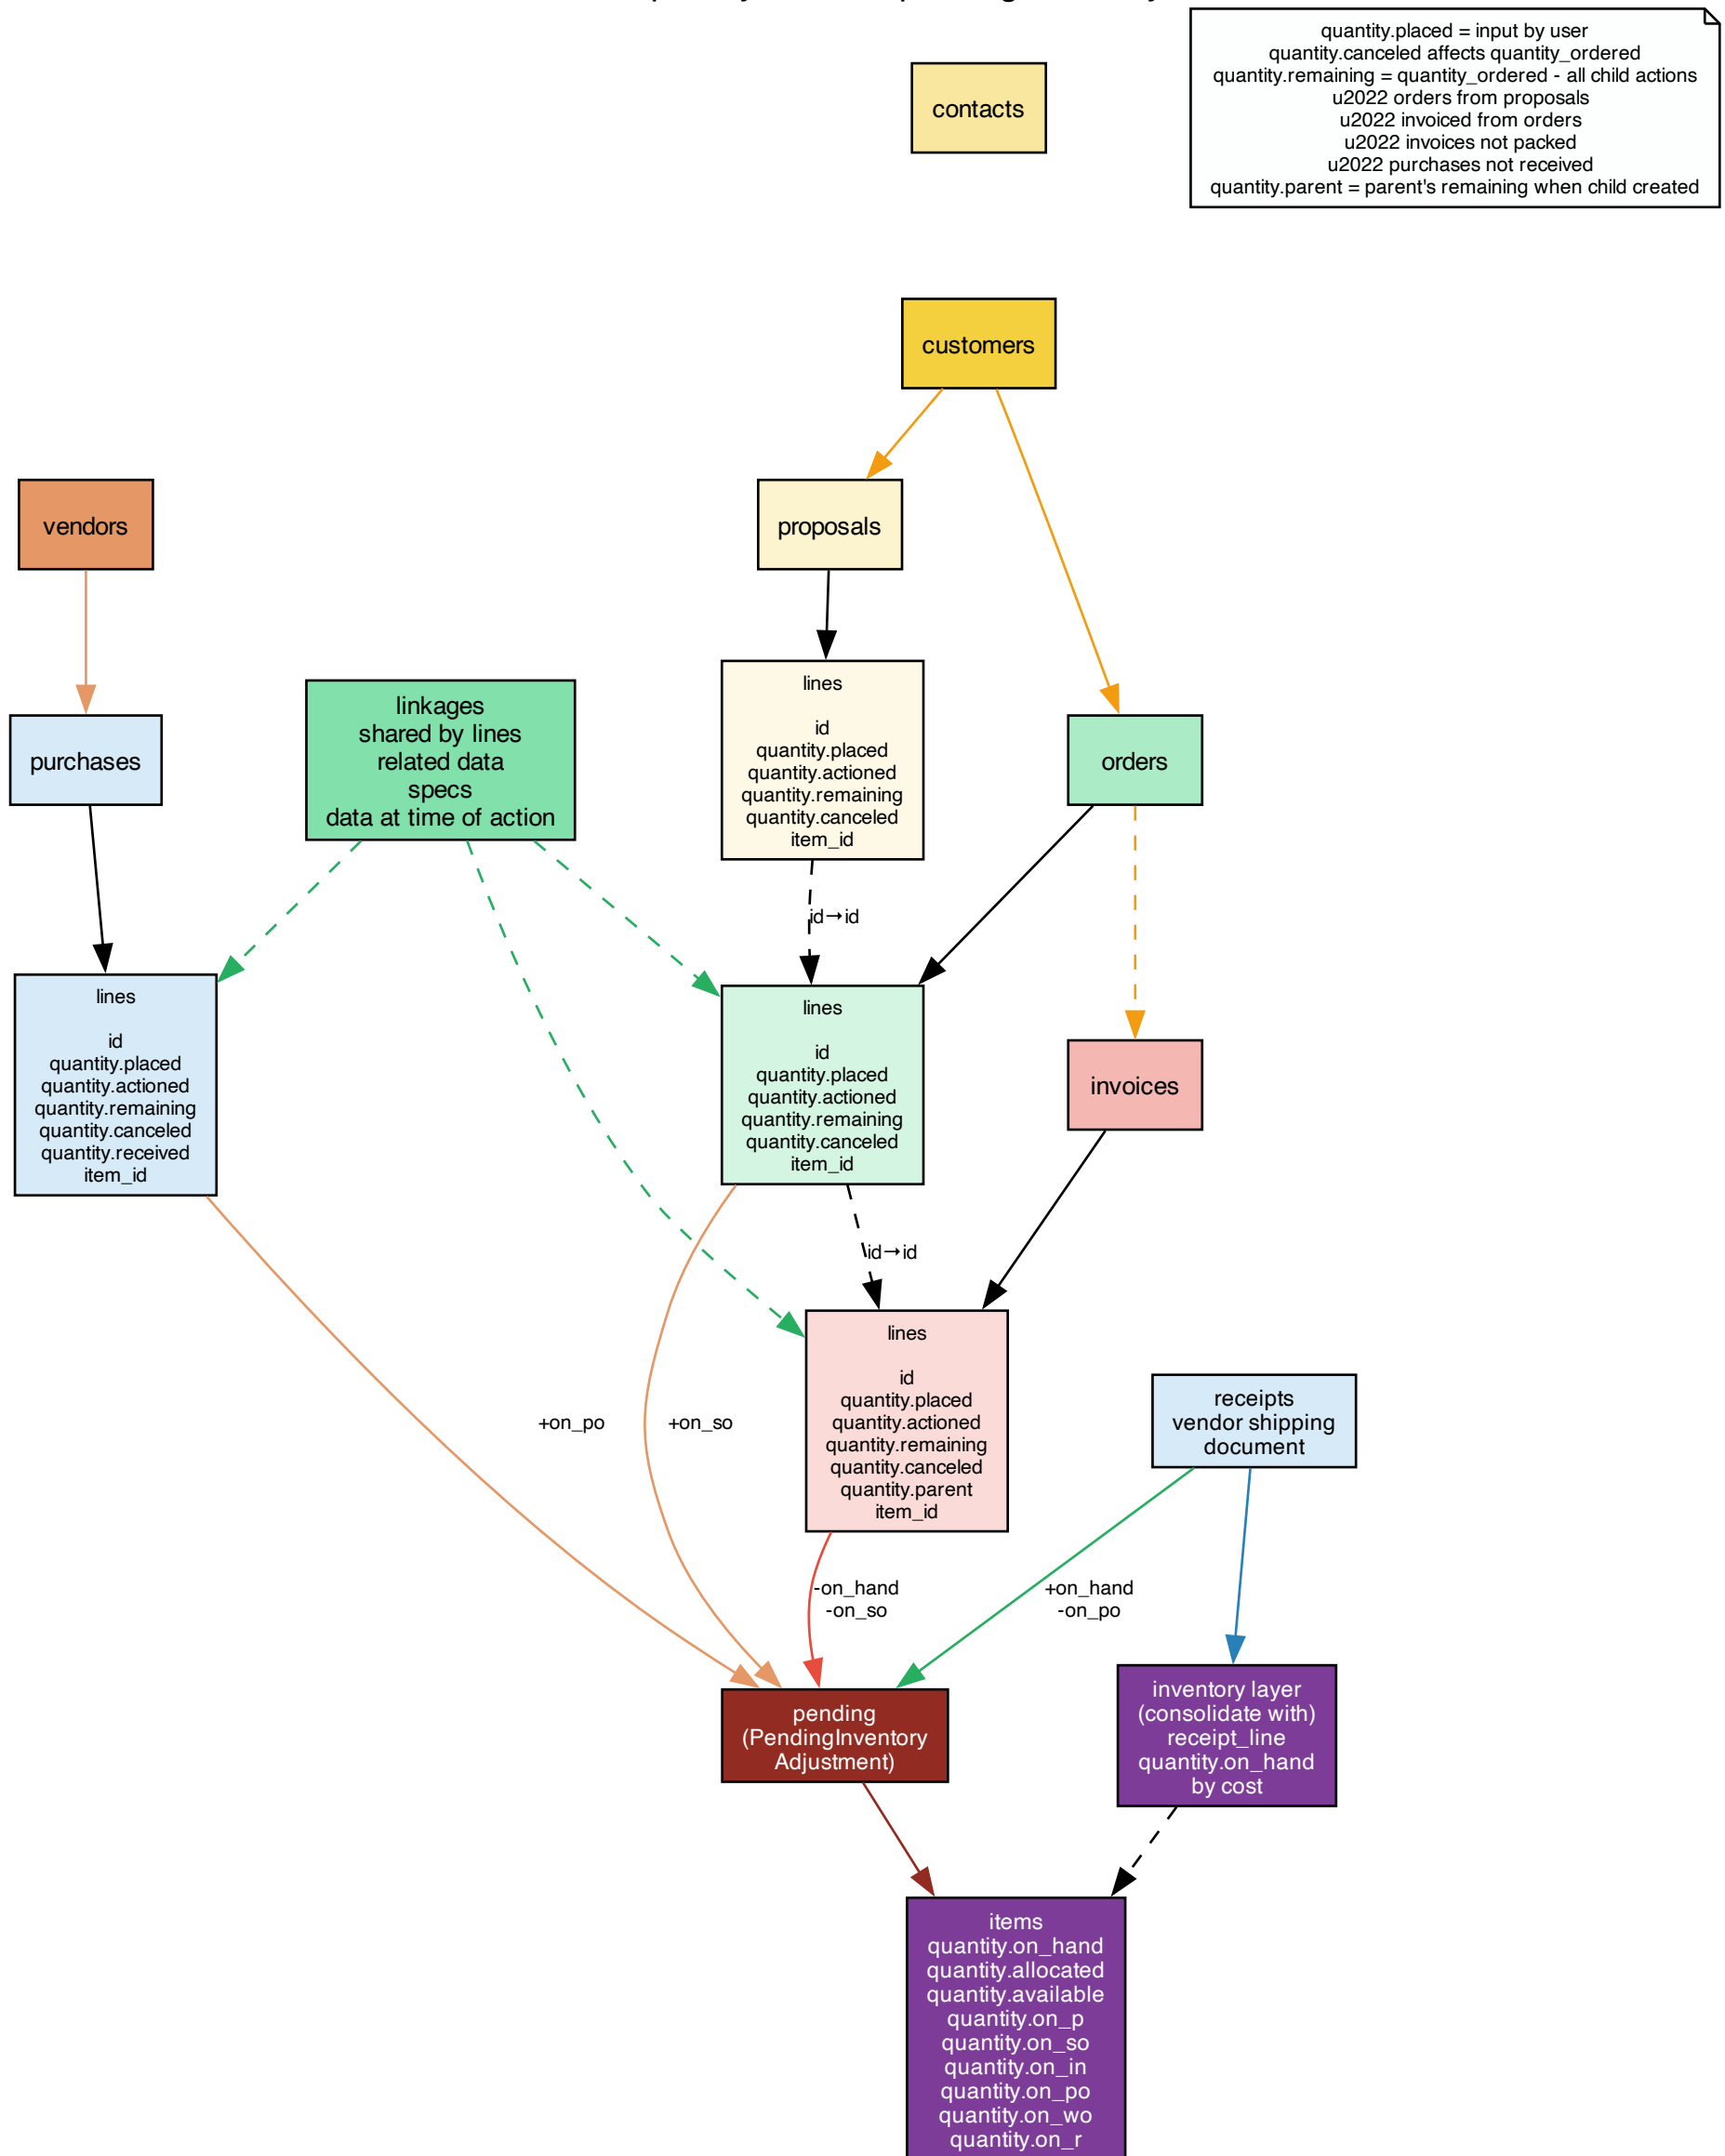

Yellow nodes = GL journal entries (debit/credit detail)

Green nodes = inventory state (quantity snapshot)

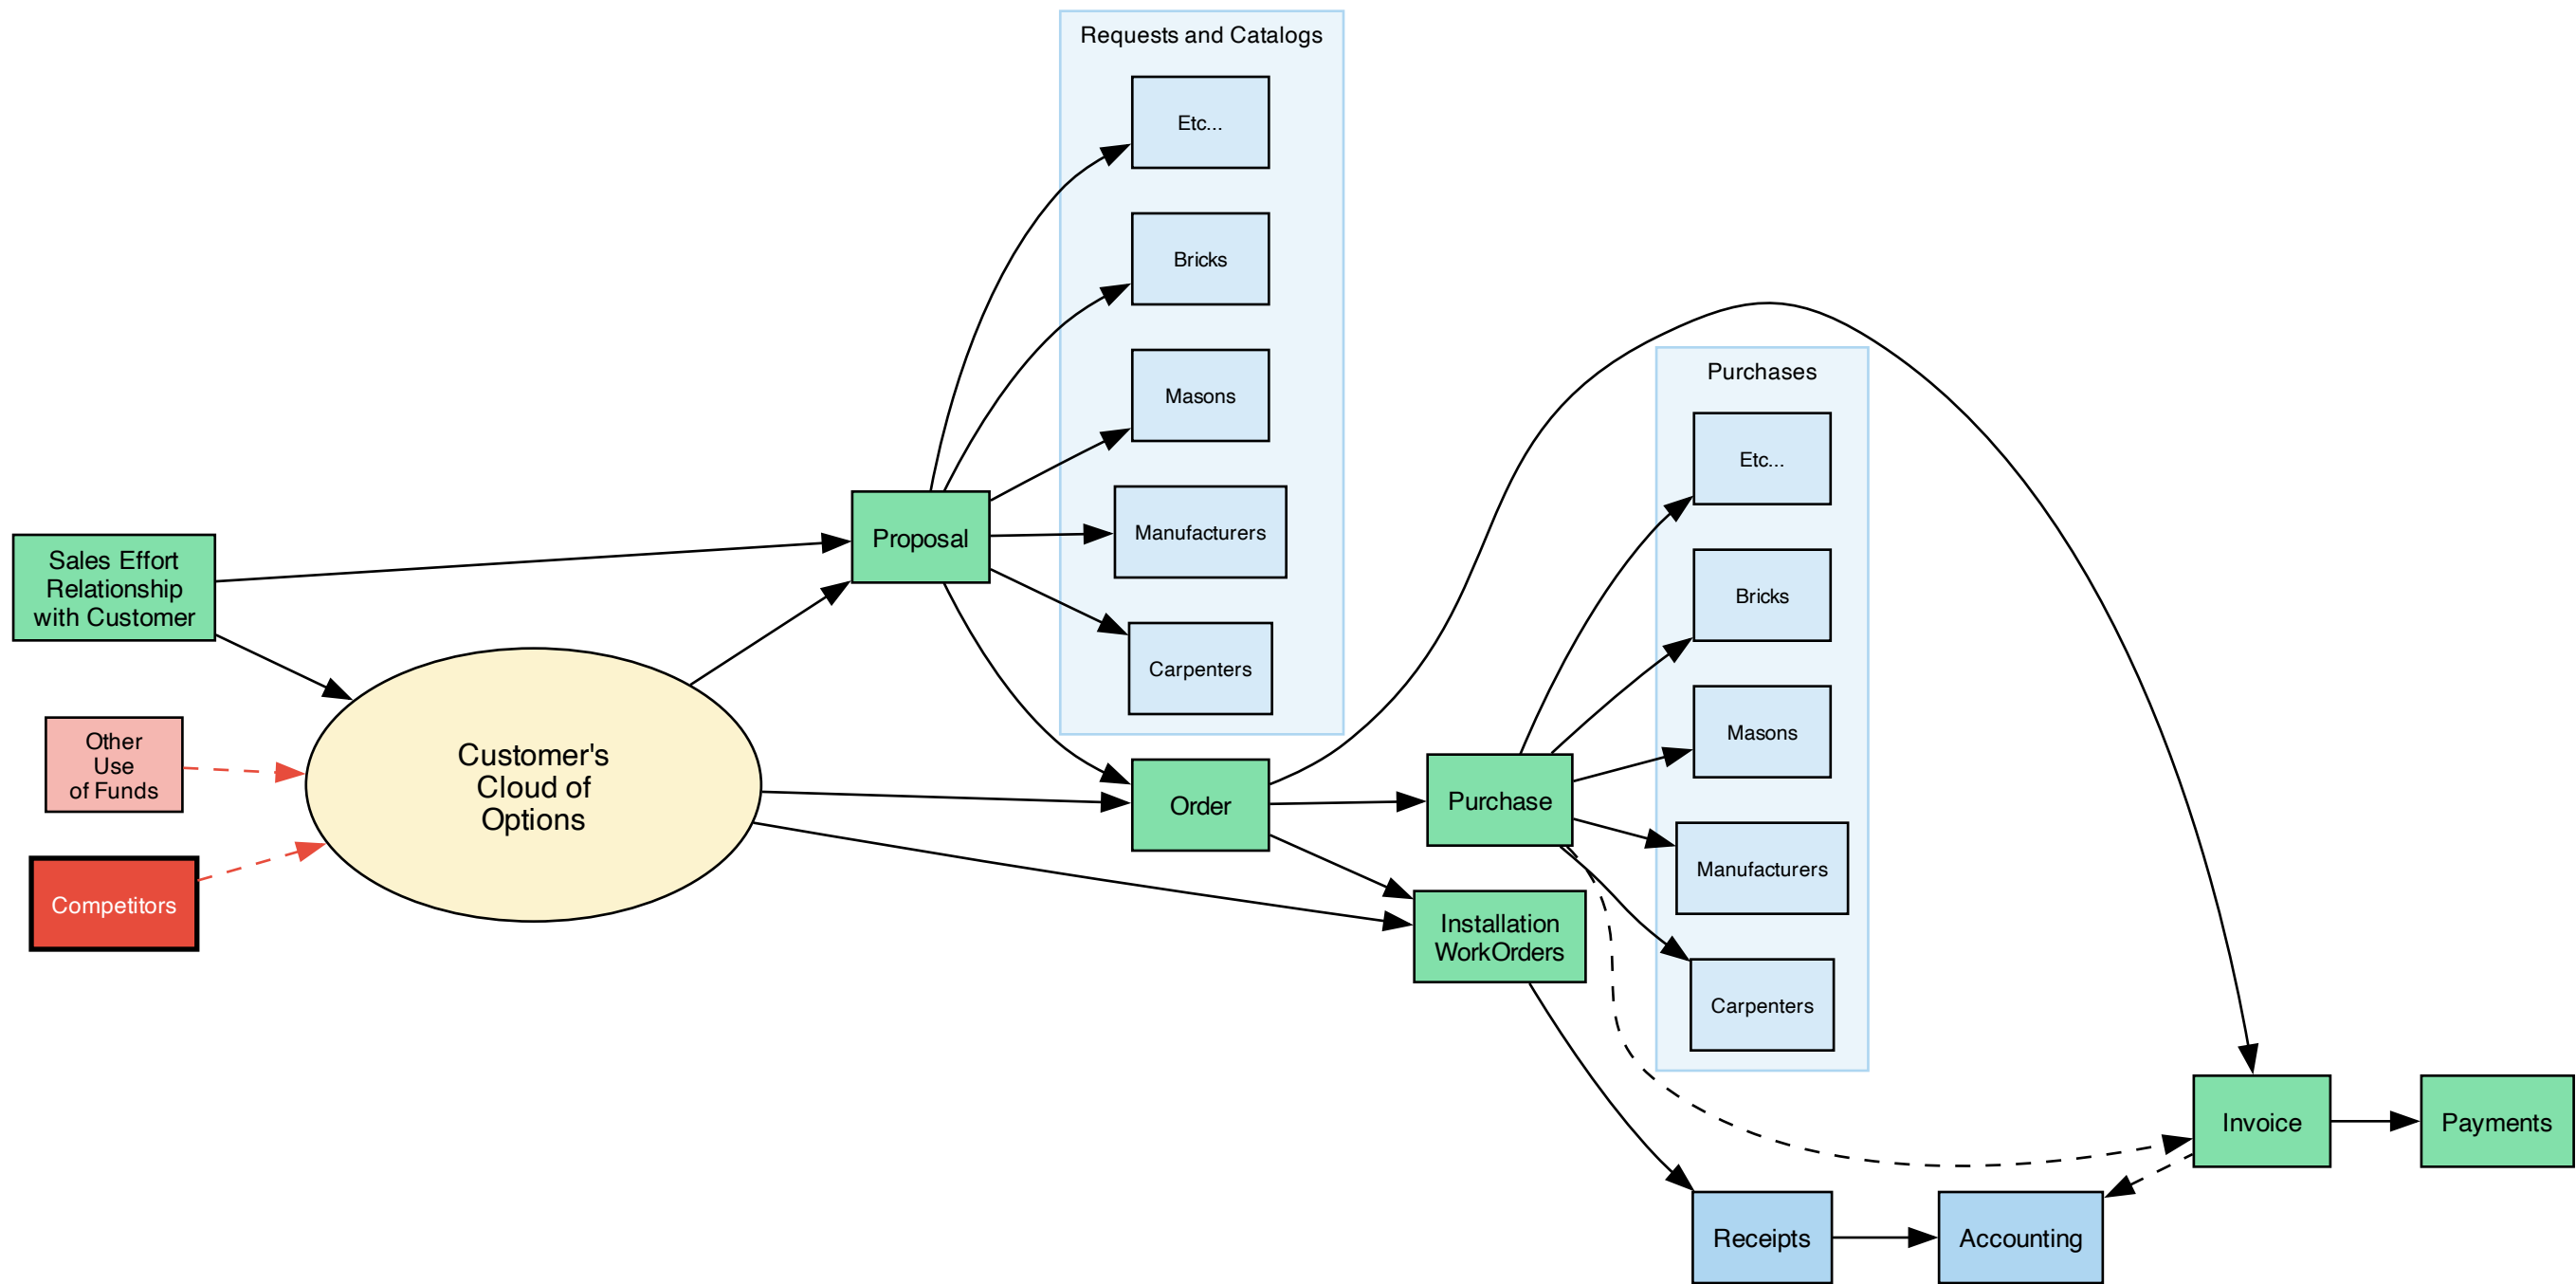

WebClerk 3 — Master Commerce Flow
(wc3 model names)

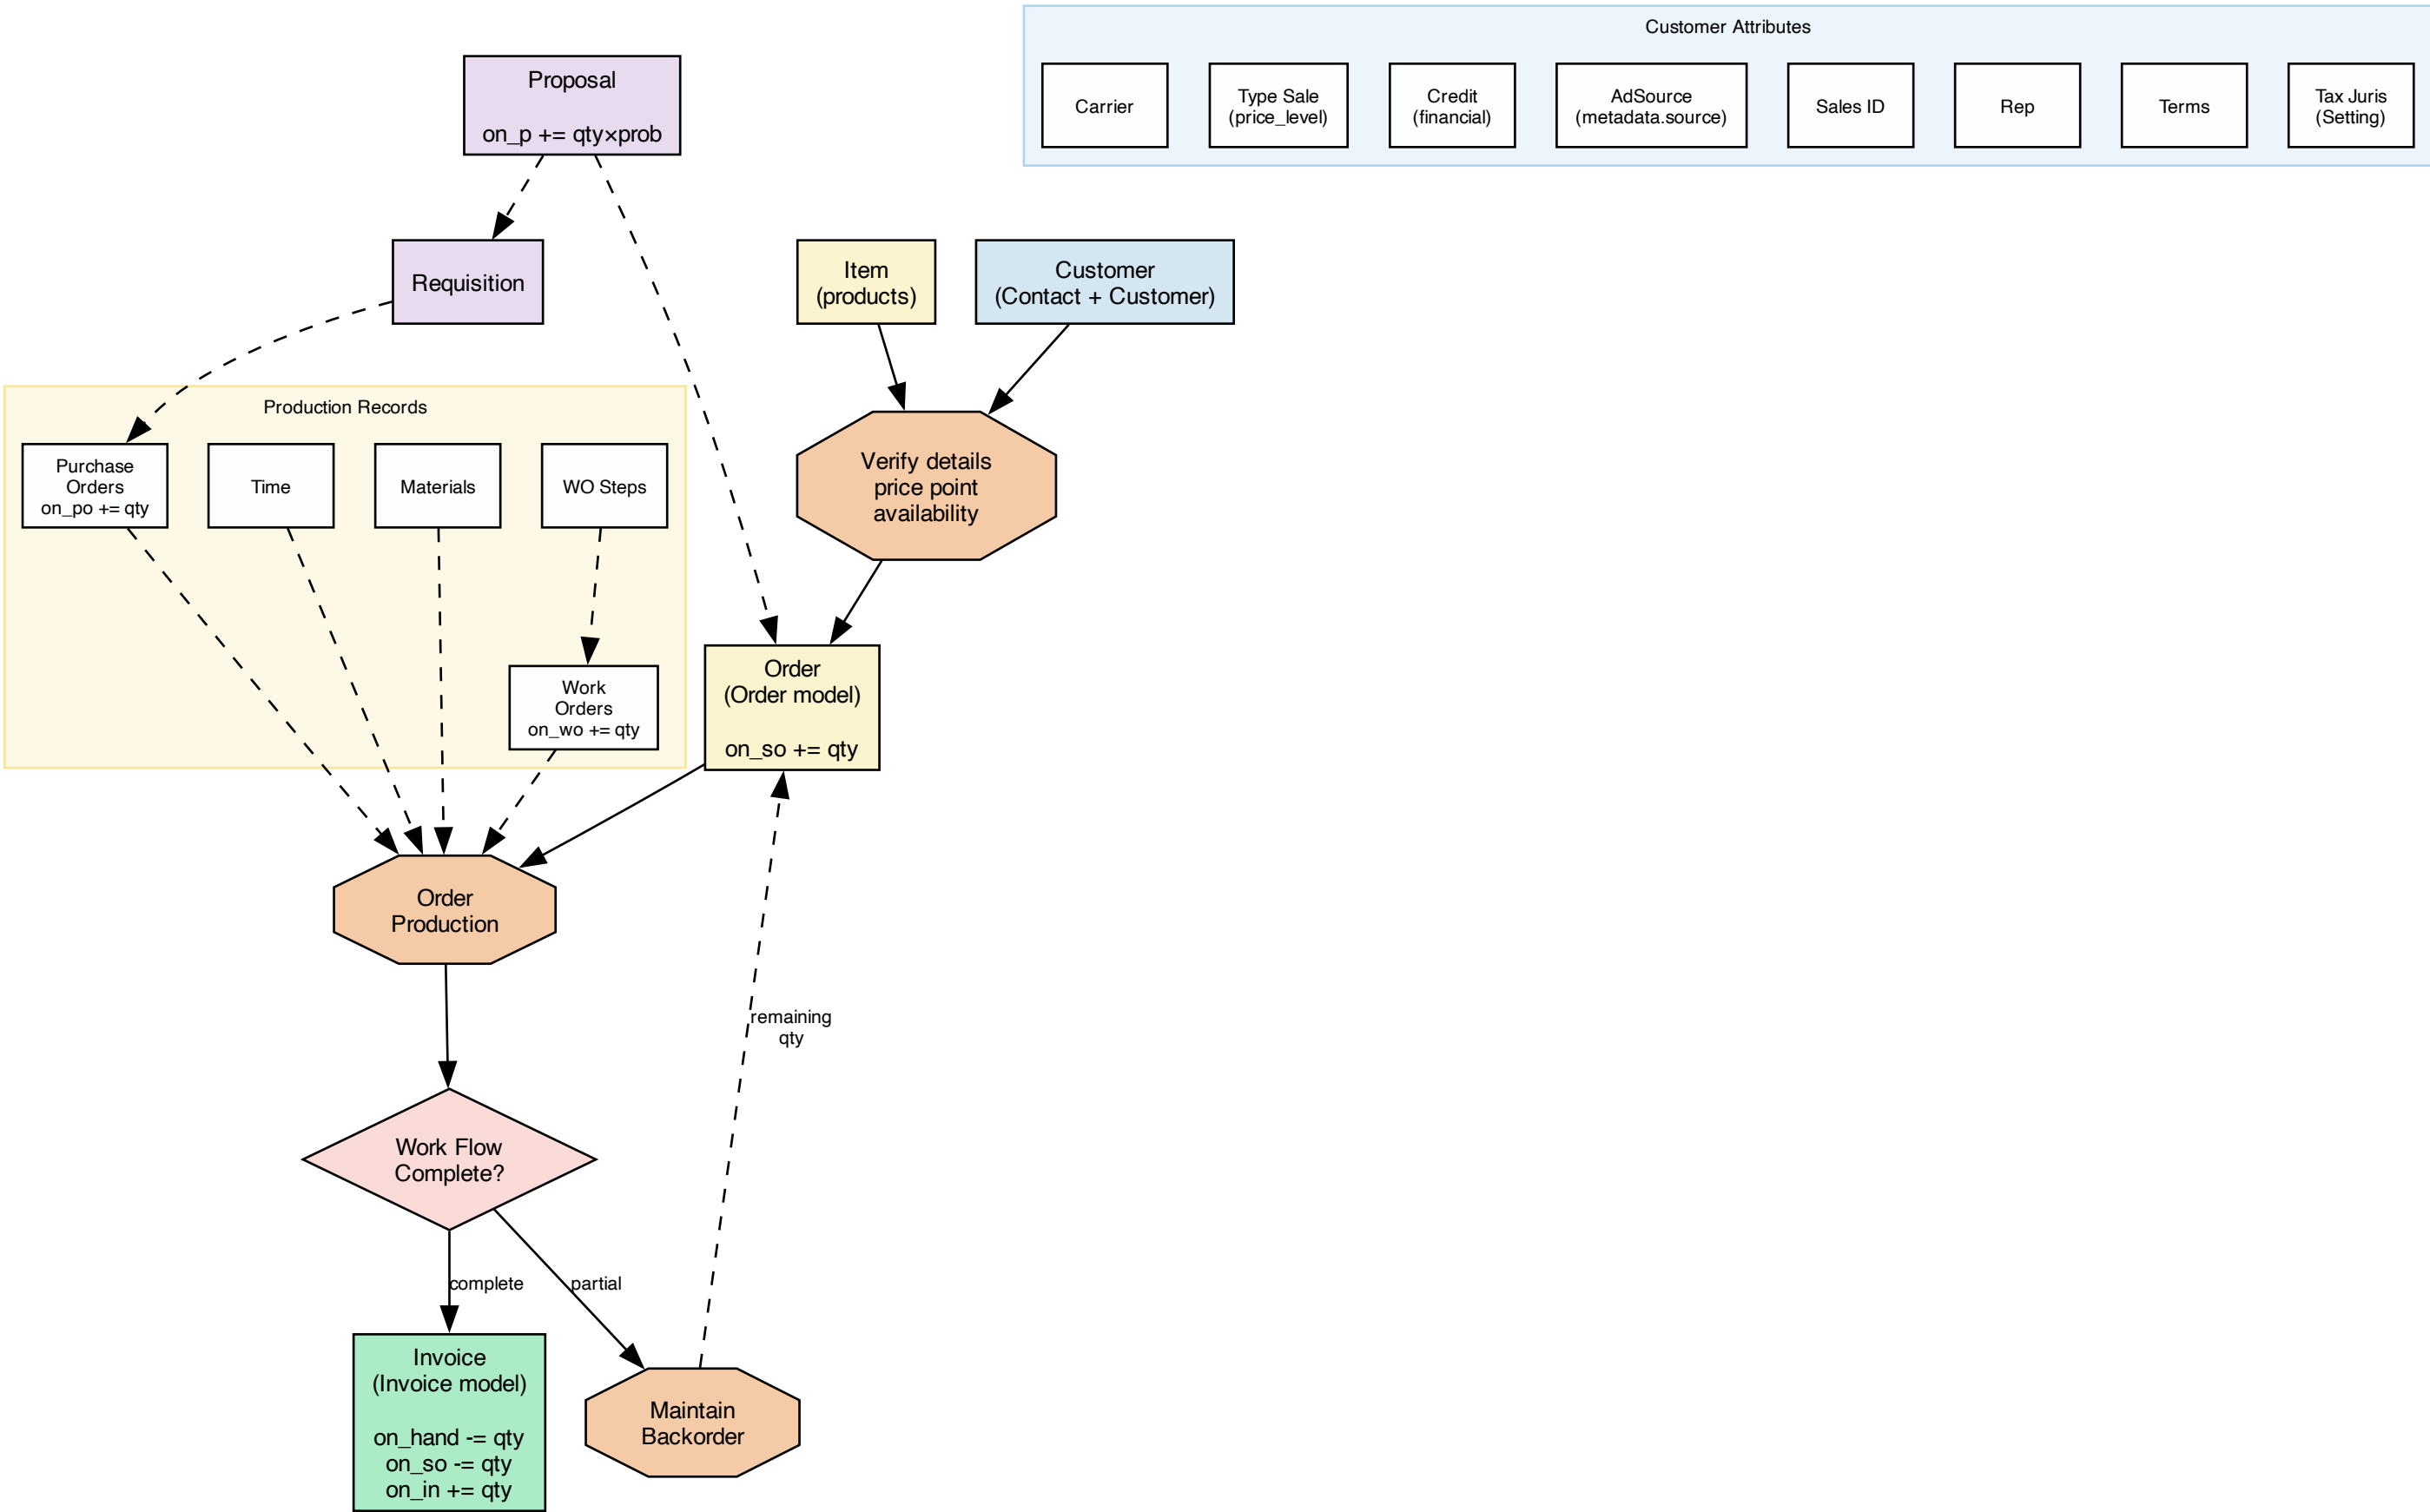

WC3 — Big 4 Transactions
Line quantity flow and pending inventory

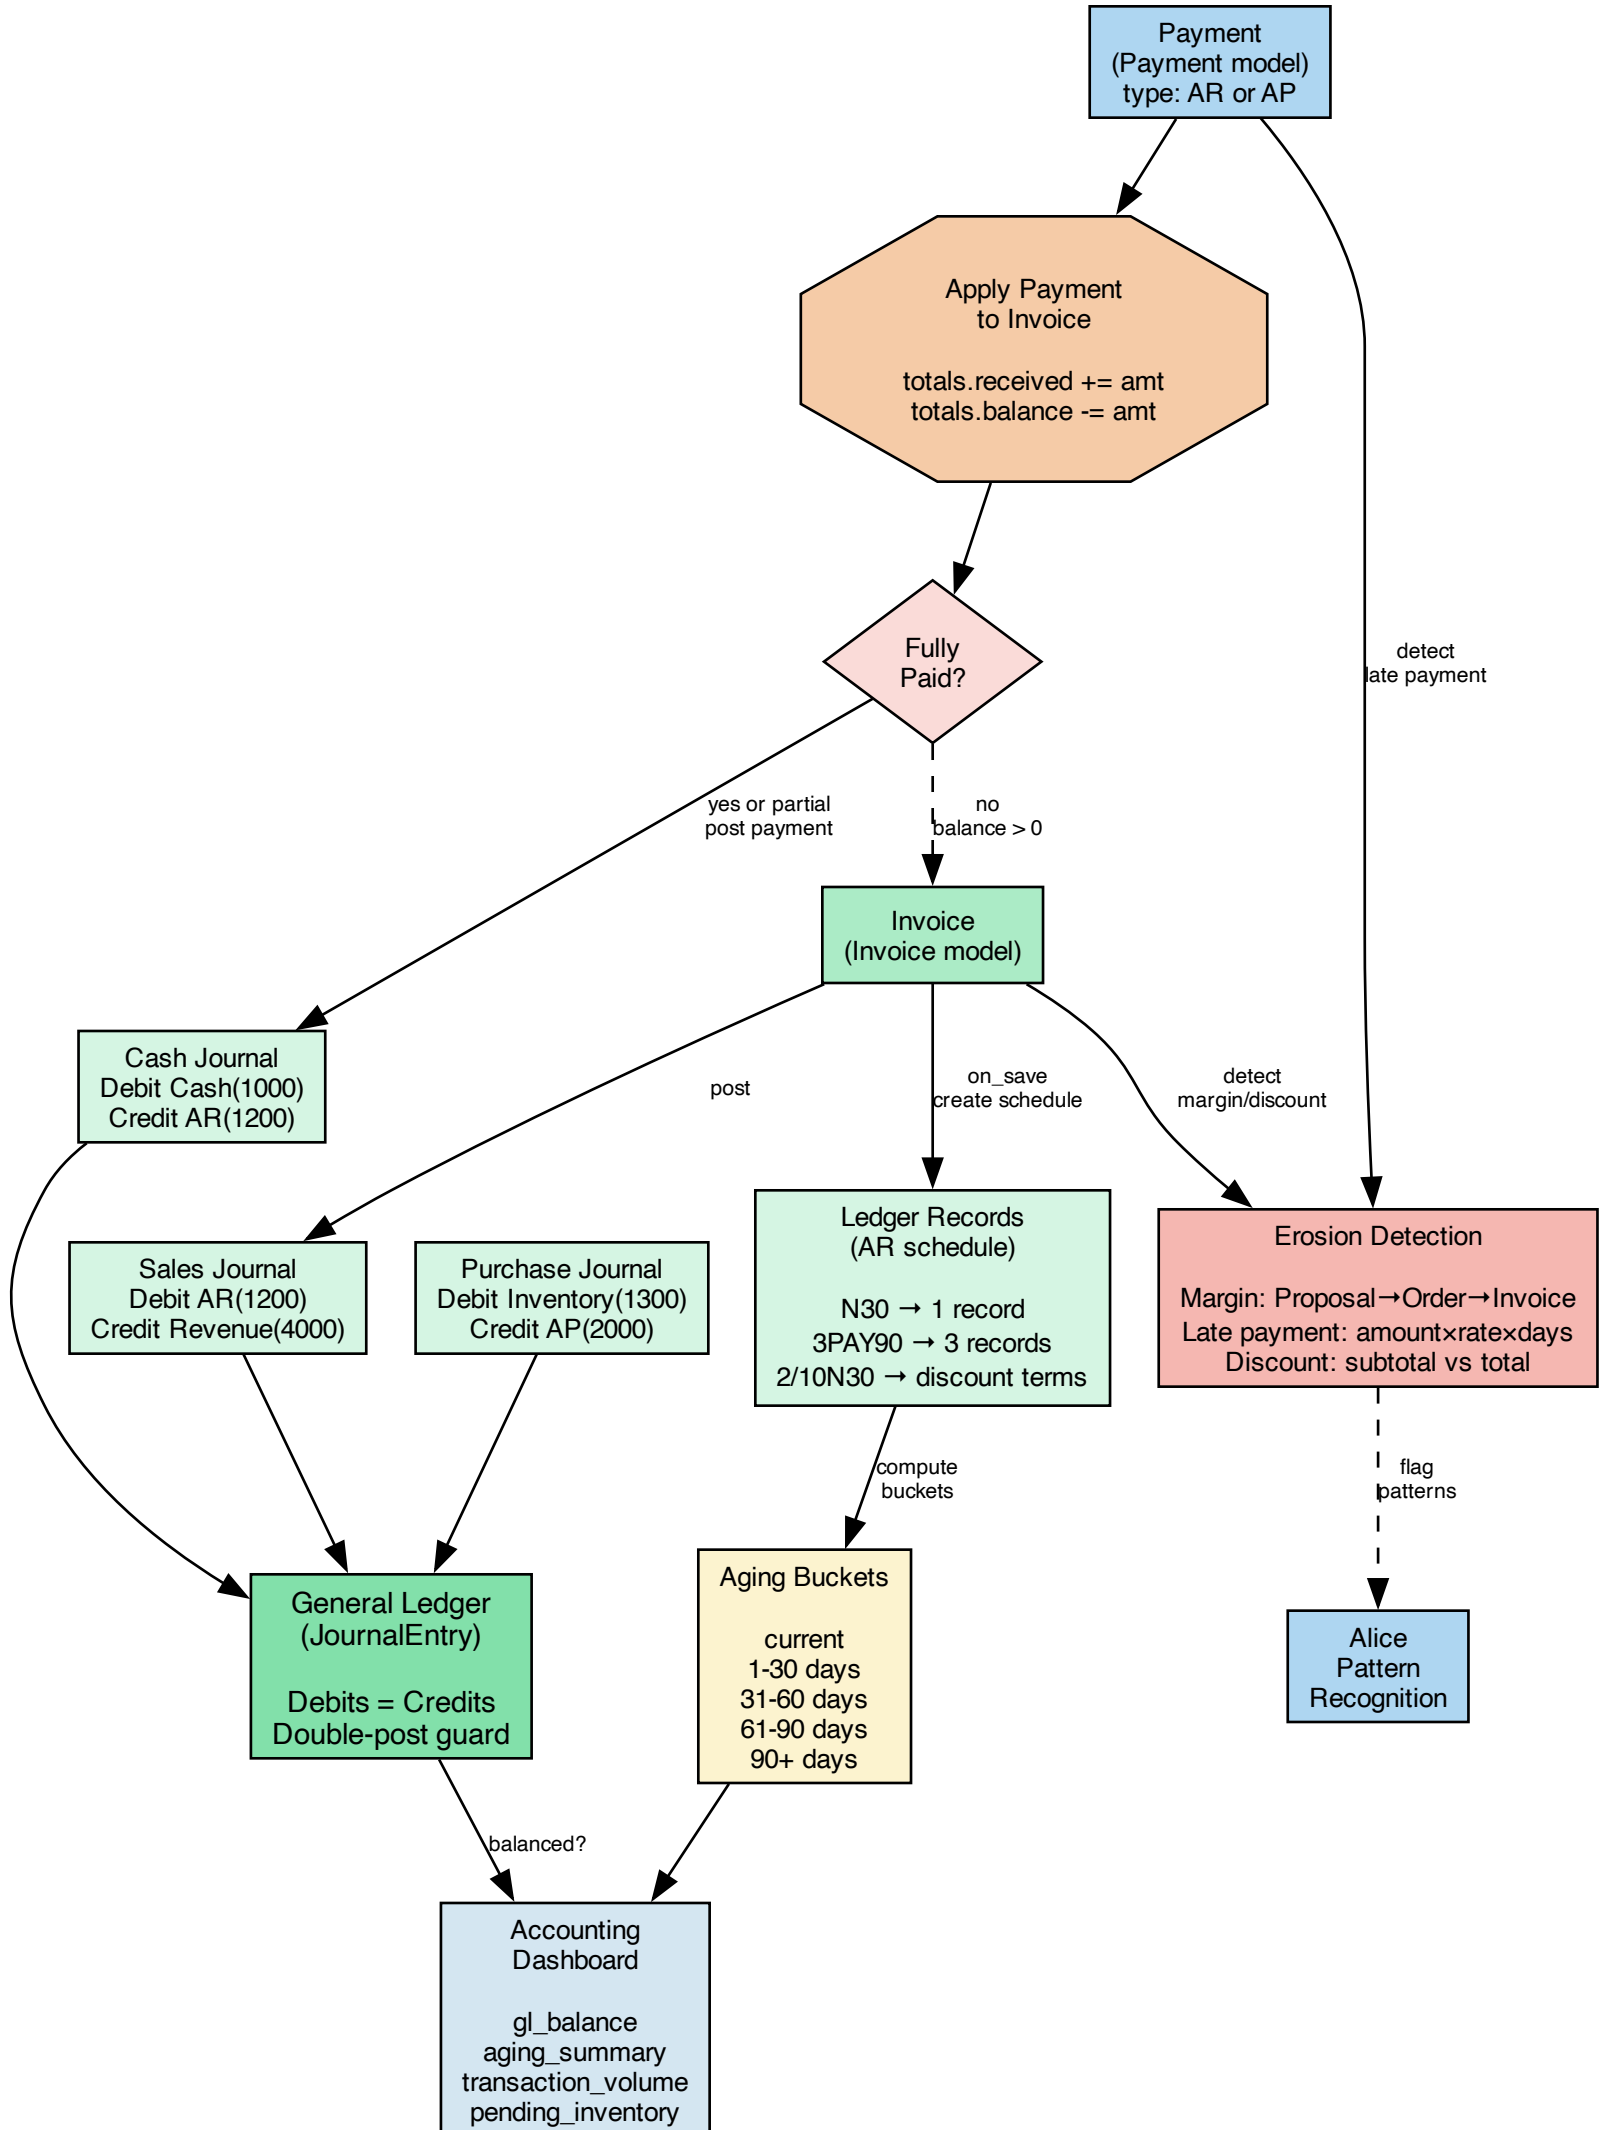

WC3 — Customer-Centered Sales
The commerce flow from the customer's perspective

WC3 — Order to Invoice Flow
(with inventory bucket effects)

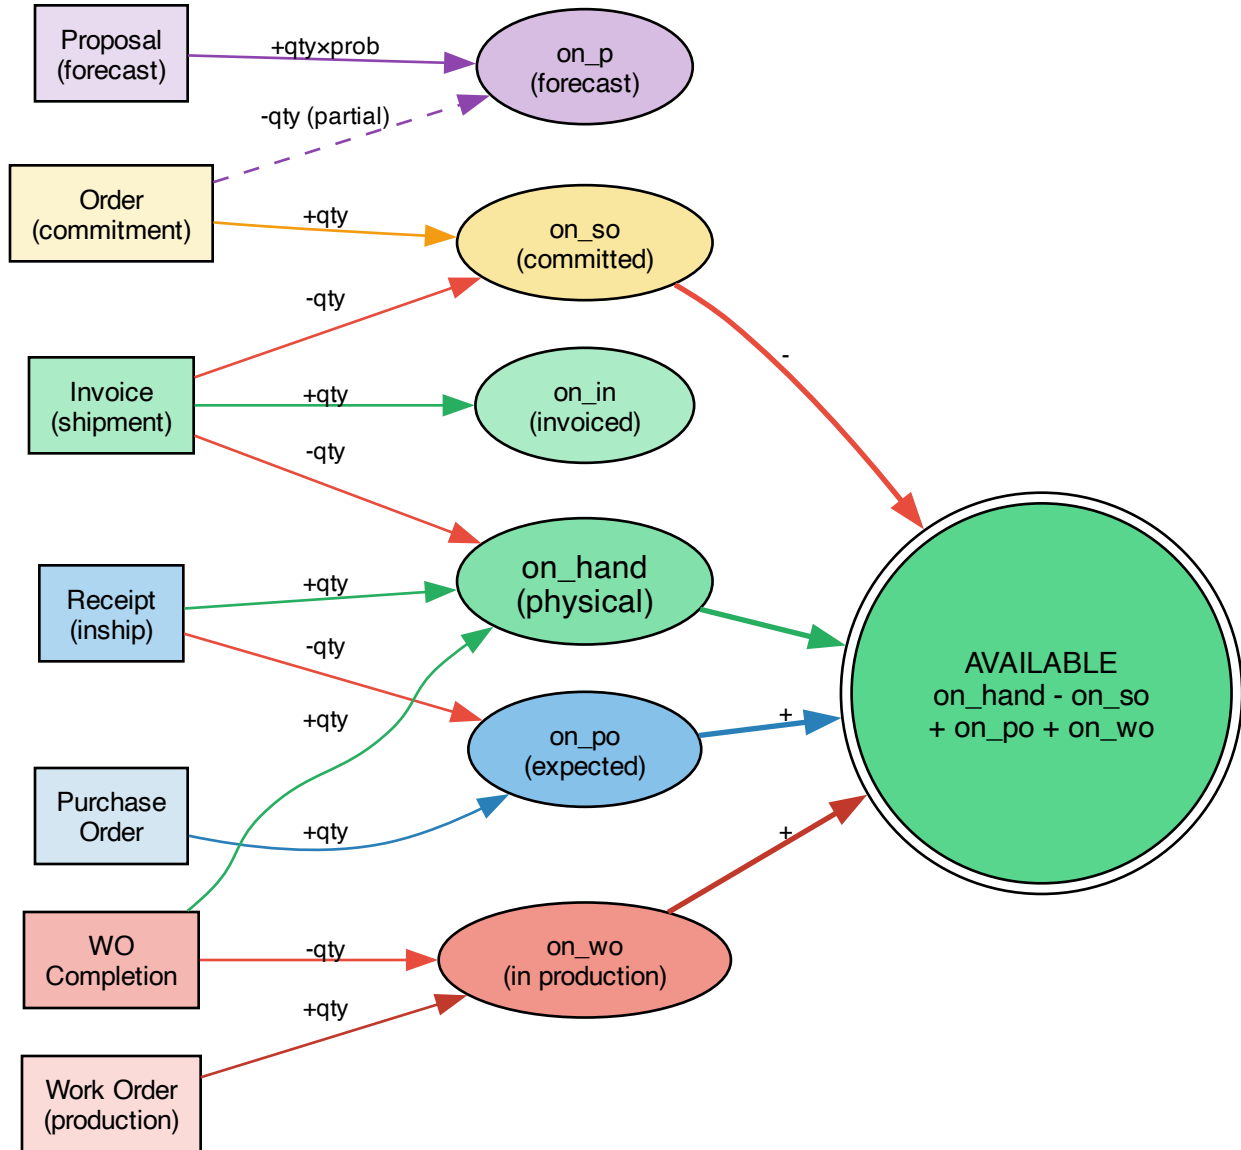

WC3 — Payment, Ledger, and GL Flow

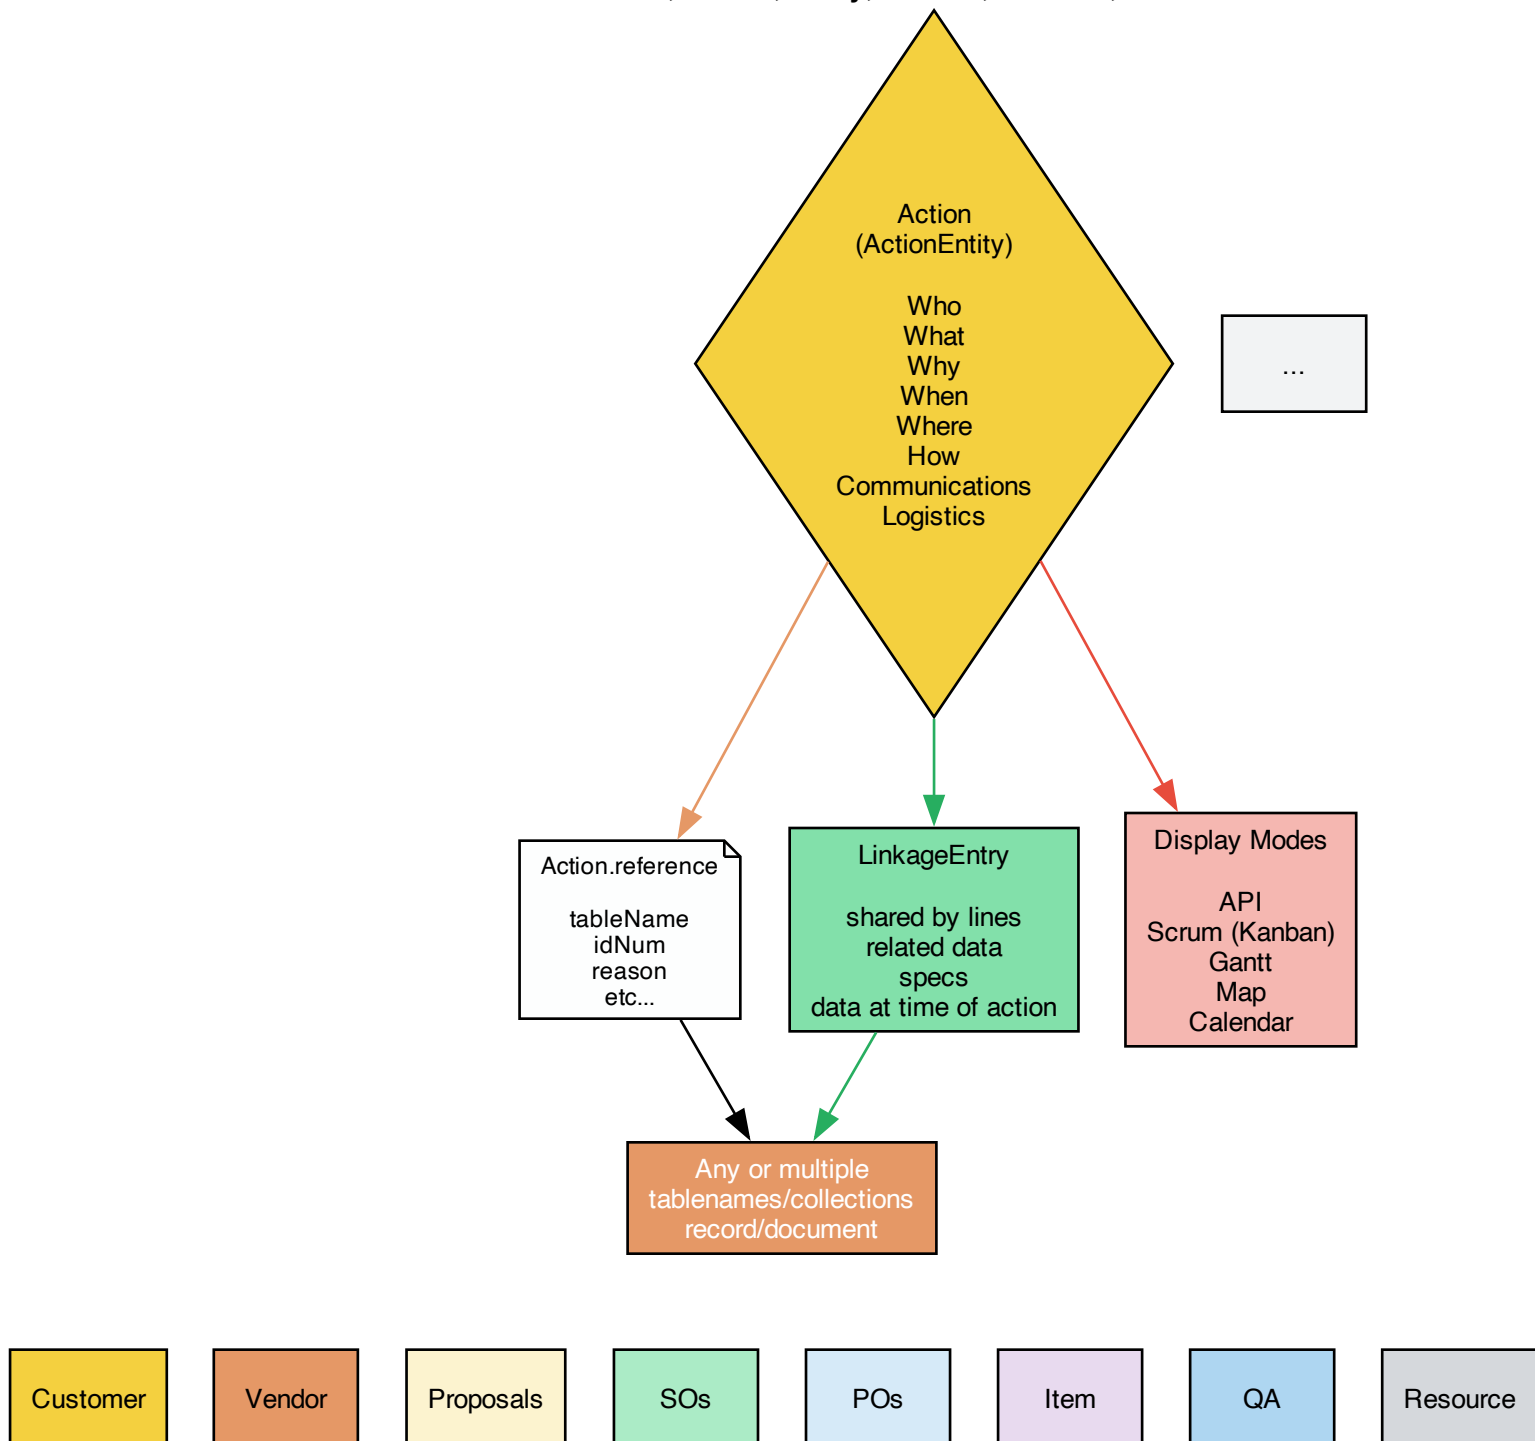

WC3 — Inventory Bucket Flow

available = on_hand - on_so + on_po + on_wo

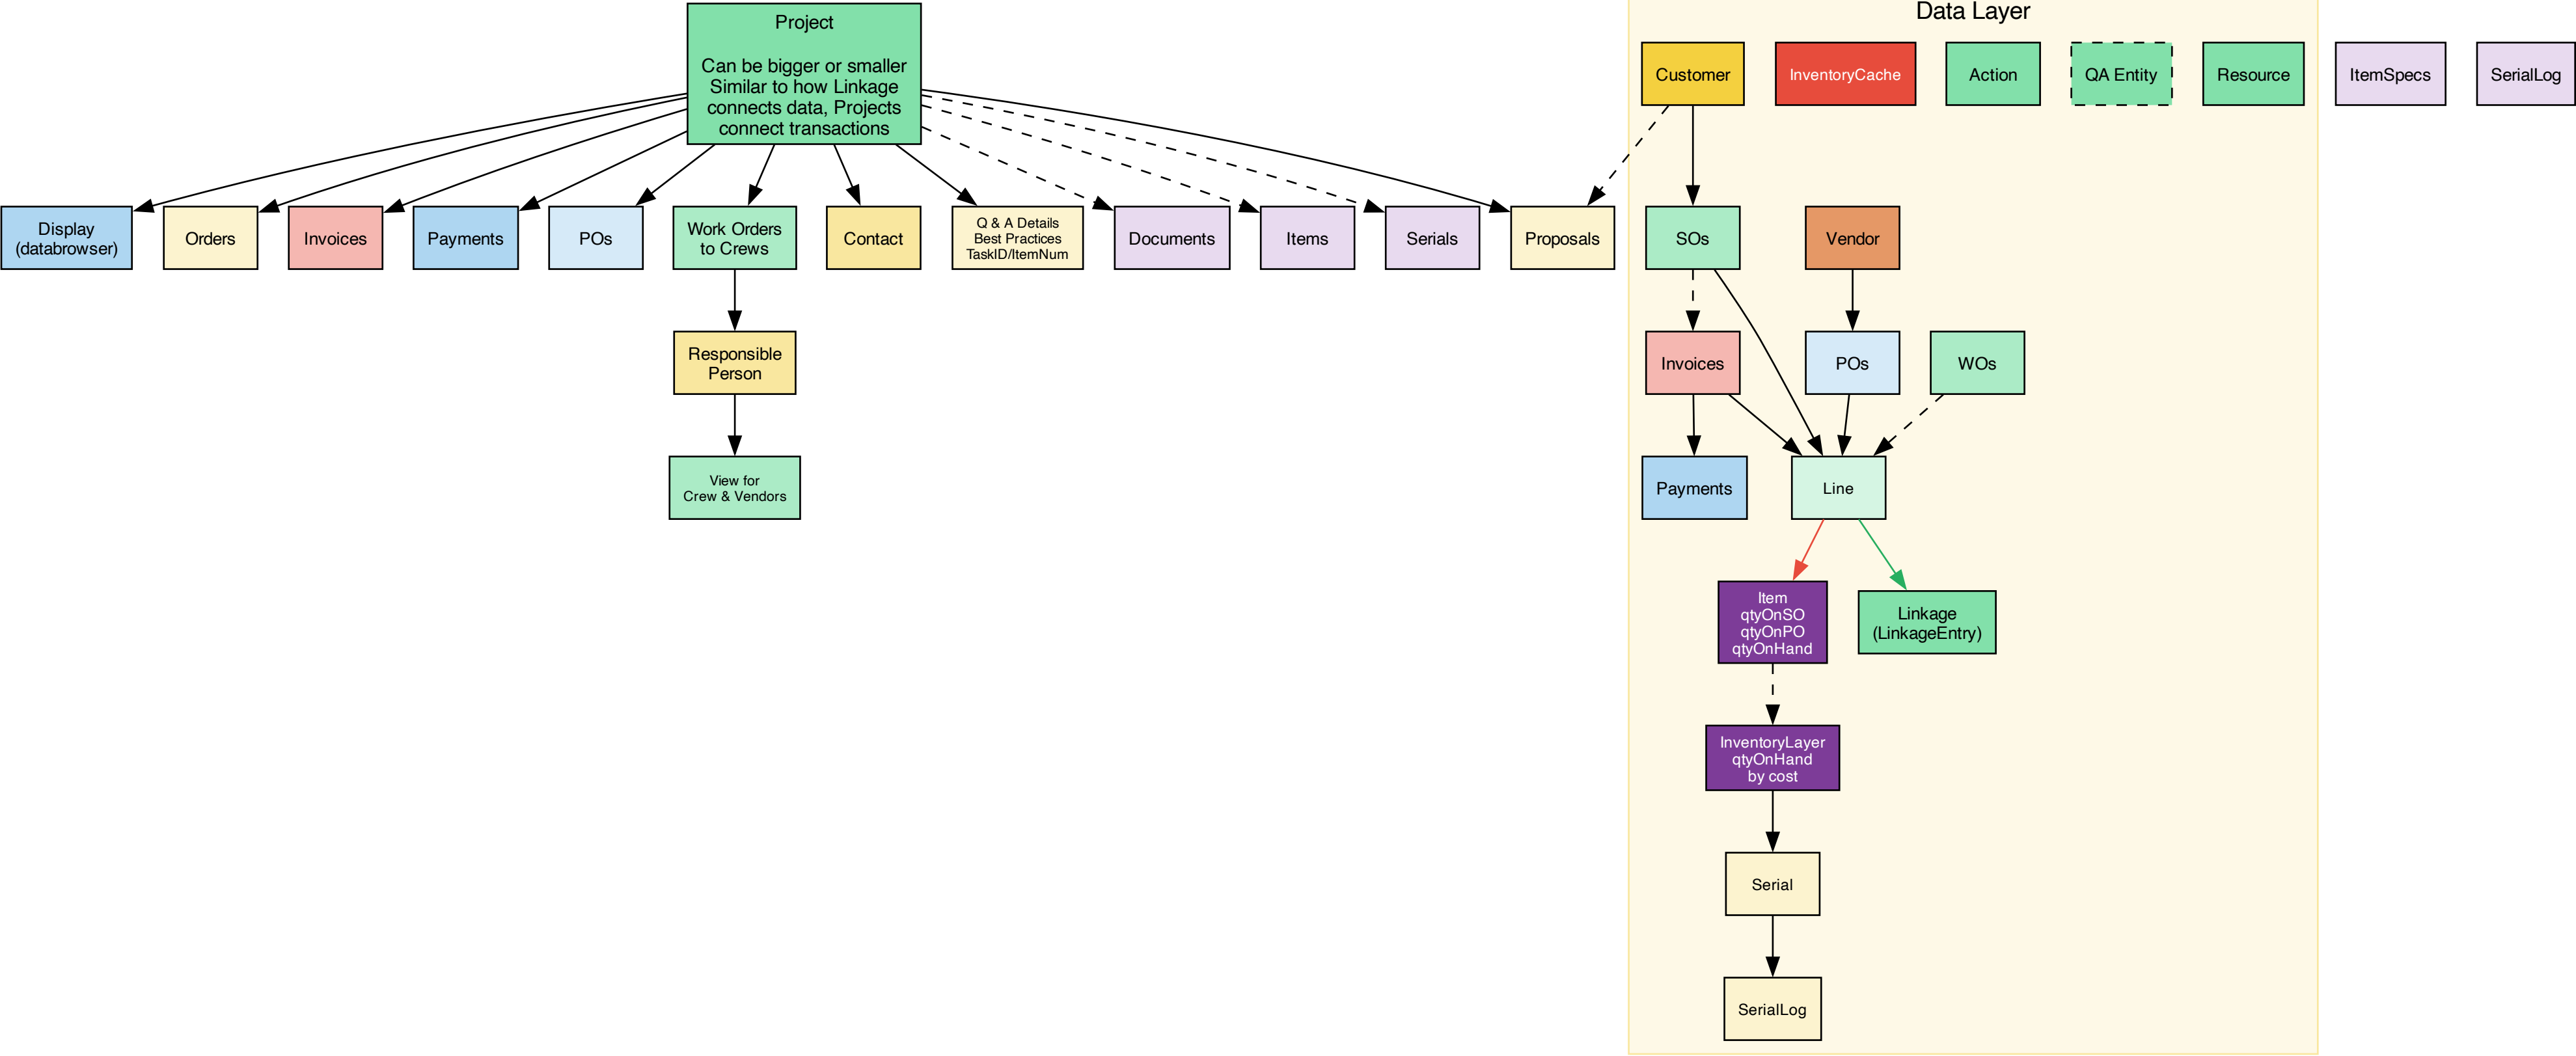

WC3 — Action Model

Universal task: Who, What, Why, When, Where, How

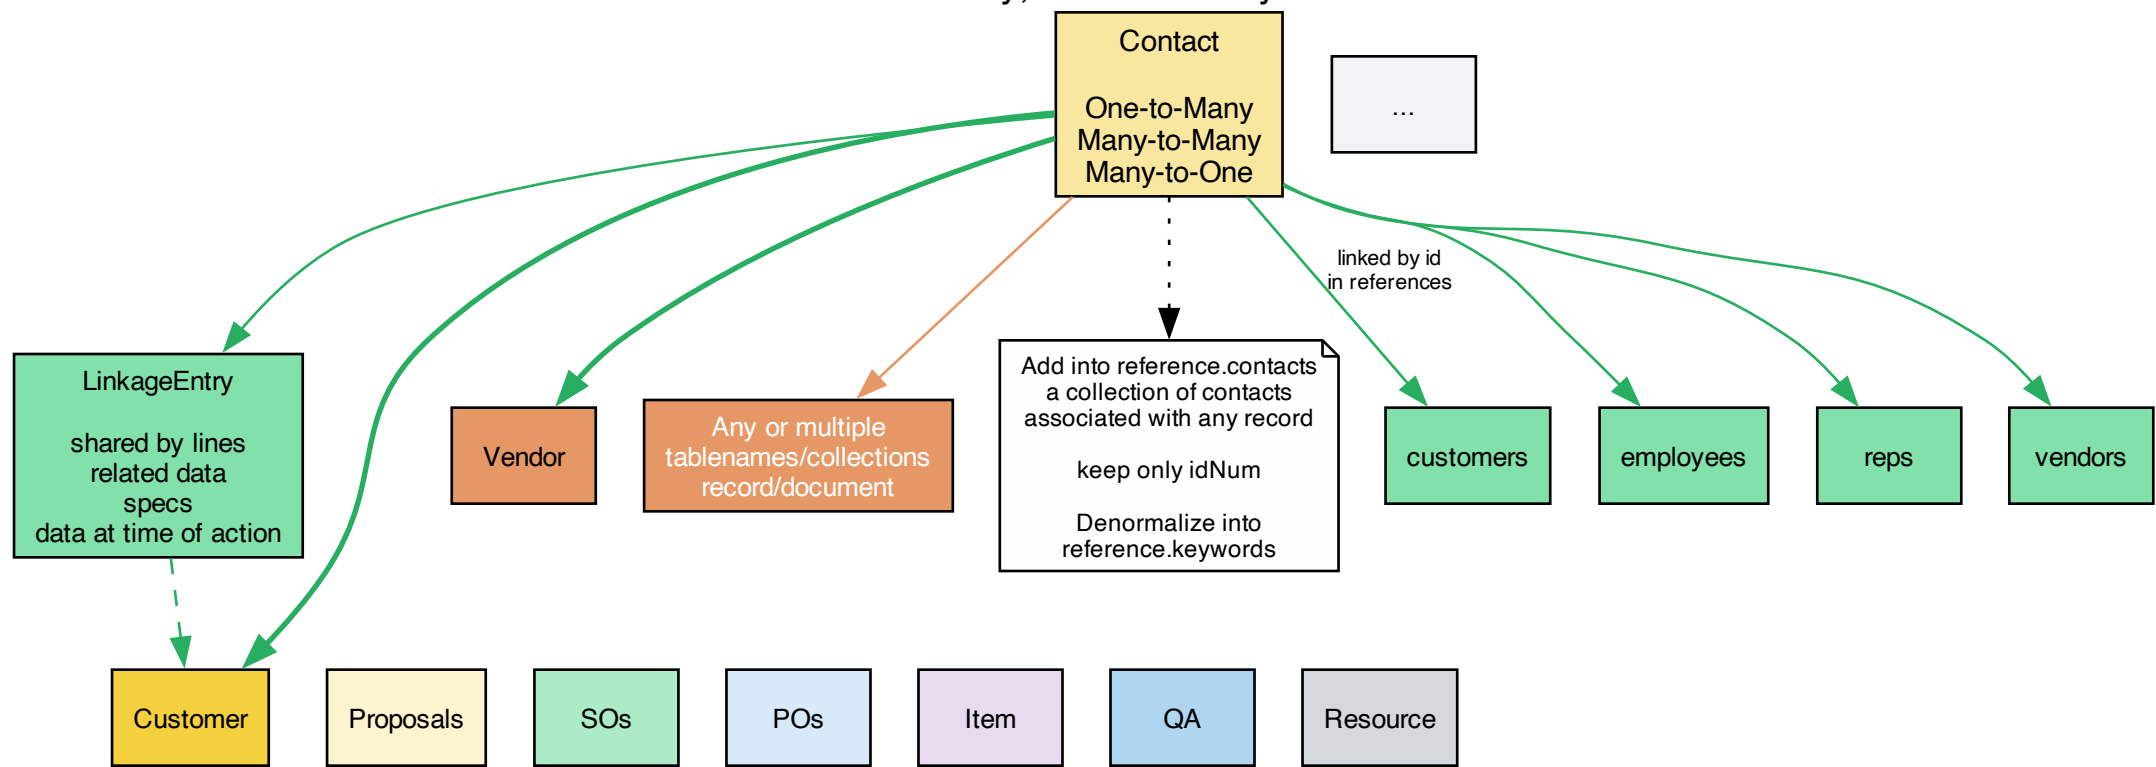

WC3 — Project Model
Project connects transactions; Linkage connects data

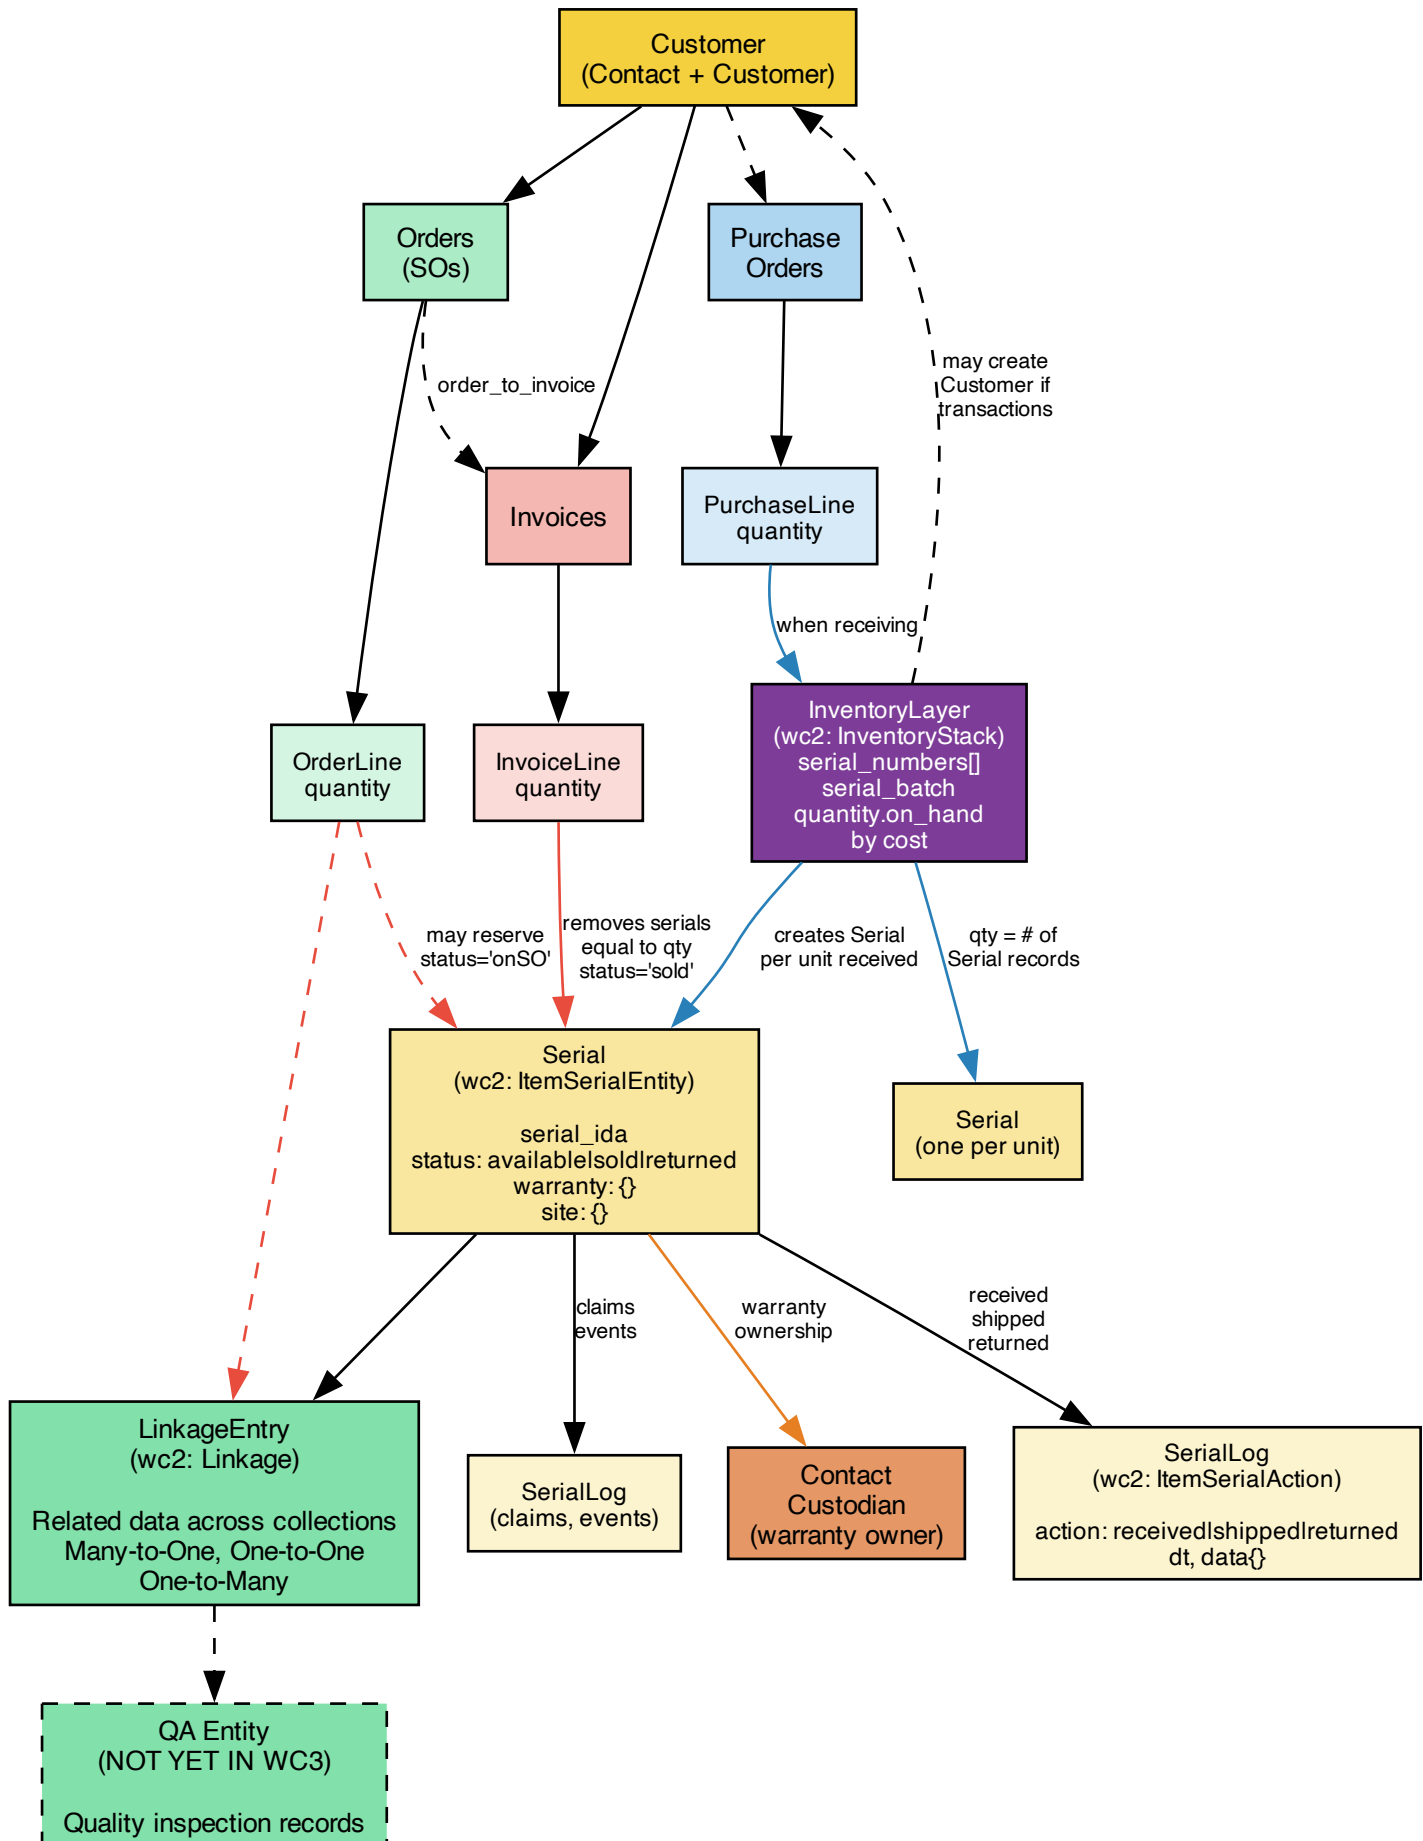

WC3 — Contact Model

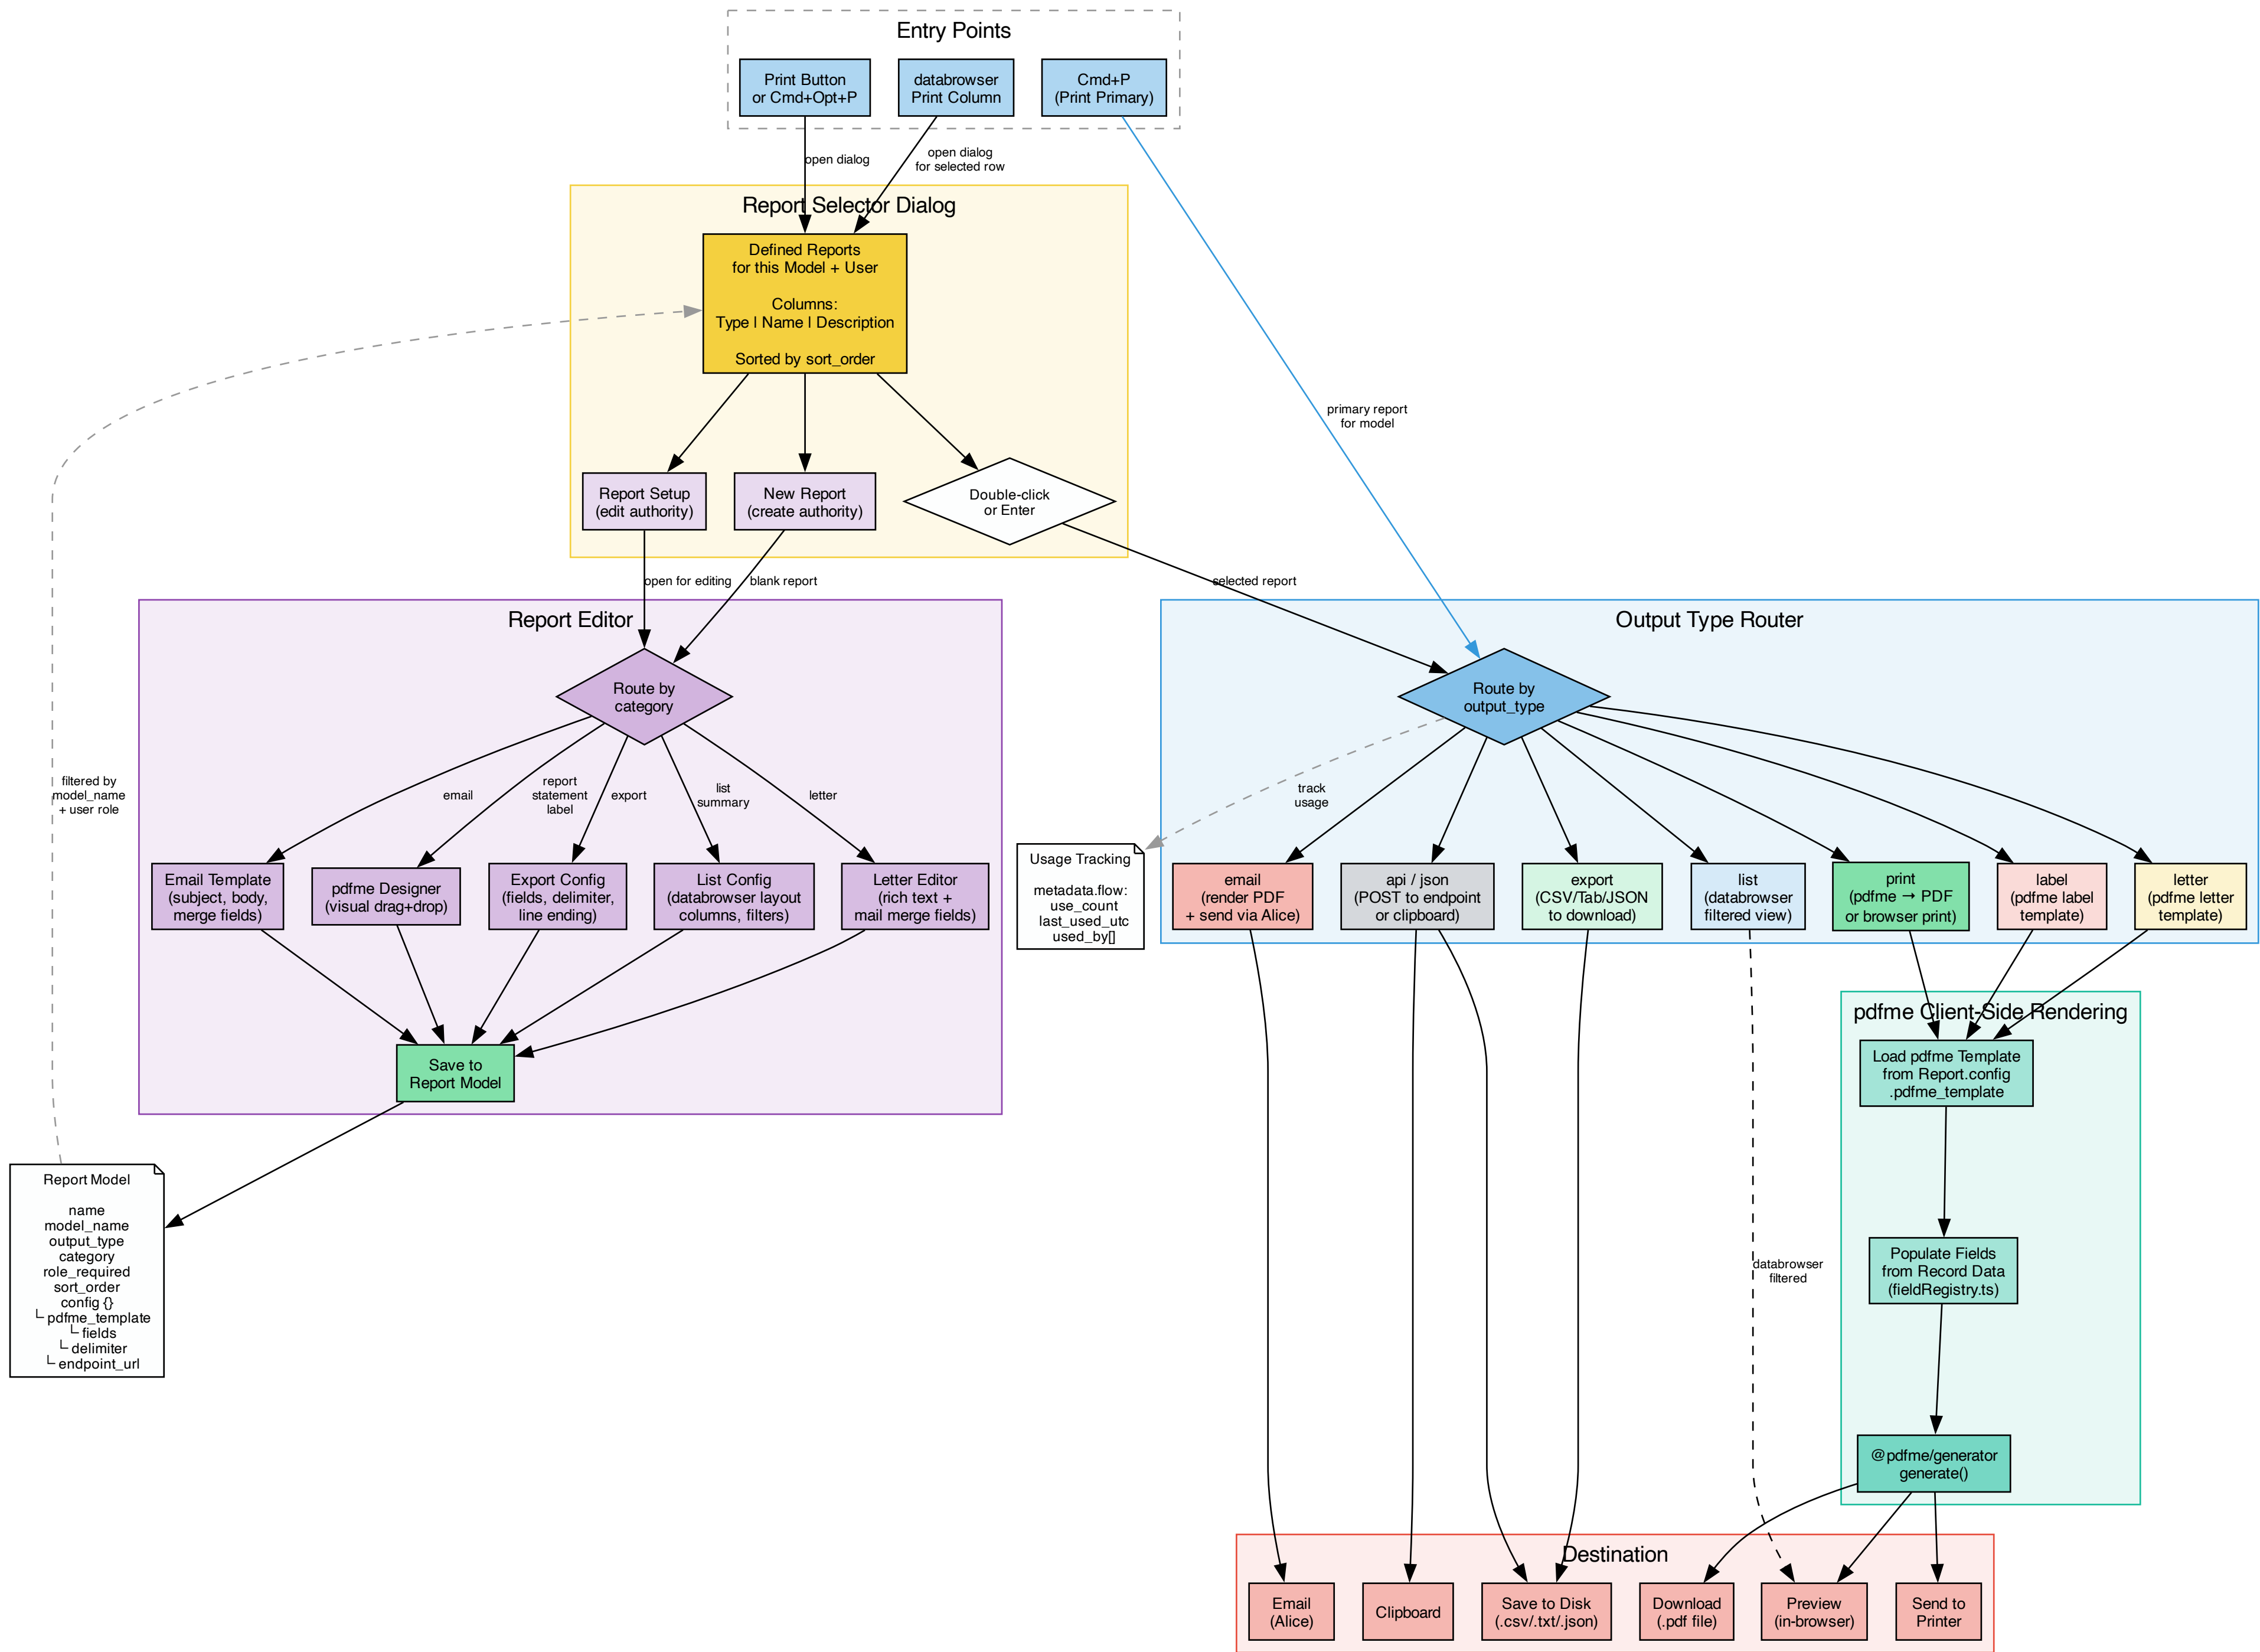

Central identity; references any record

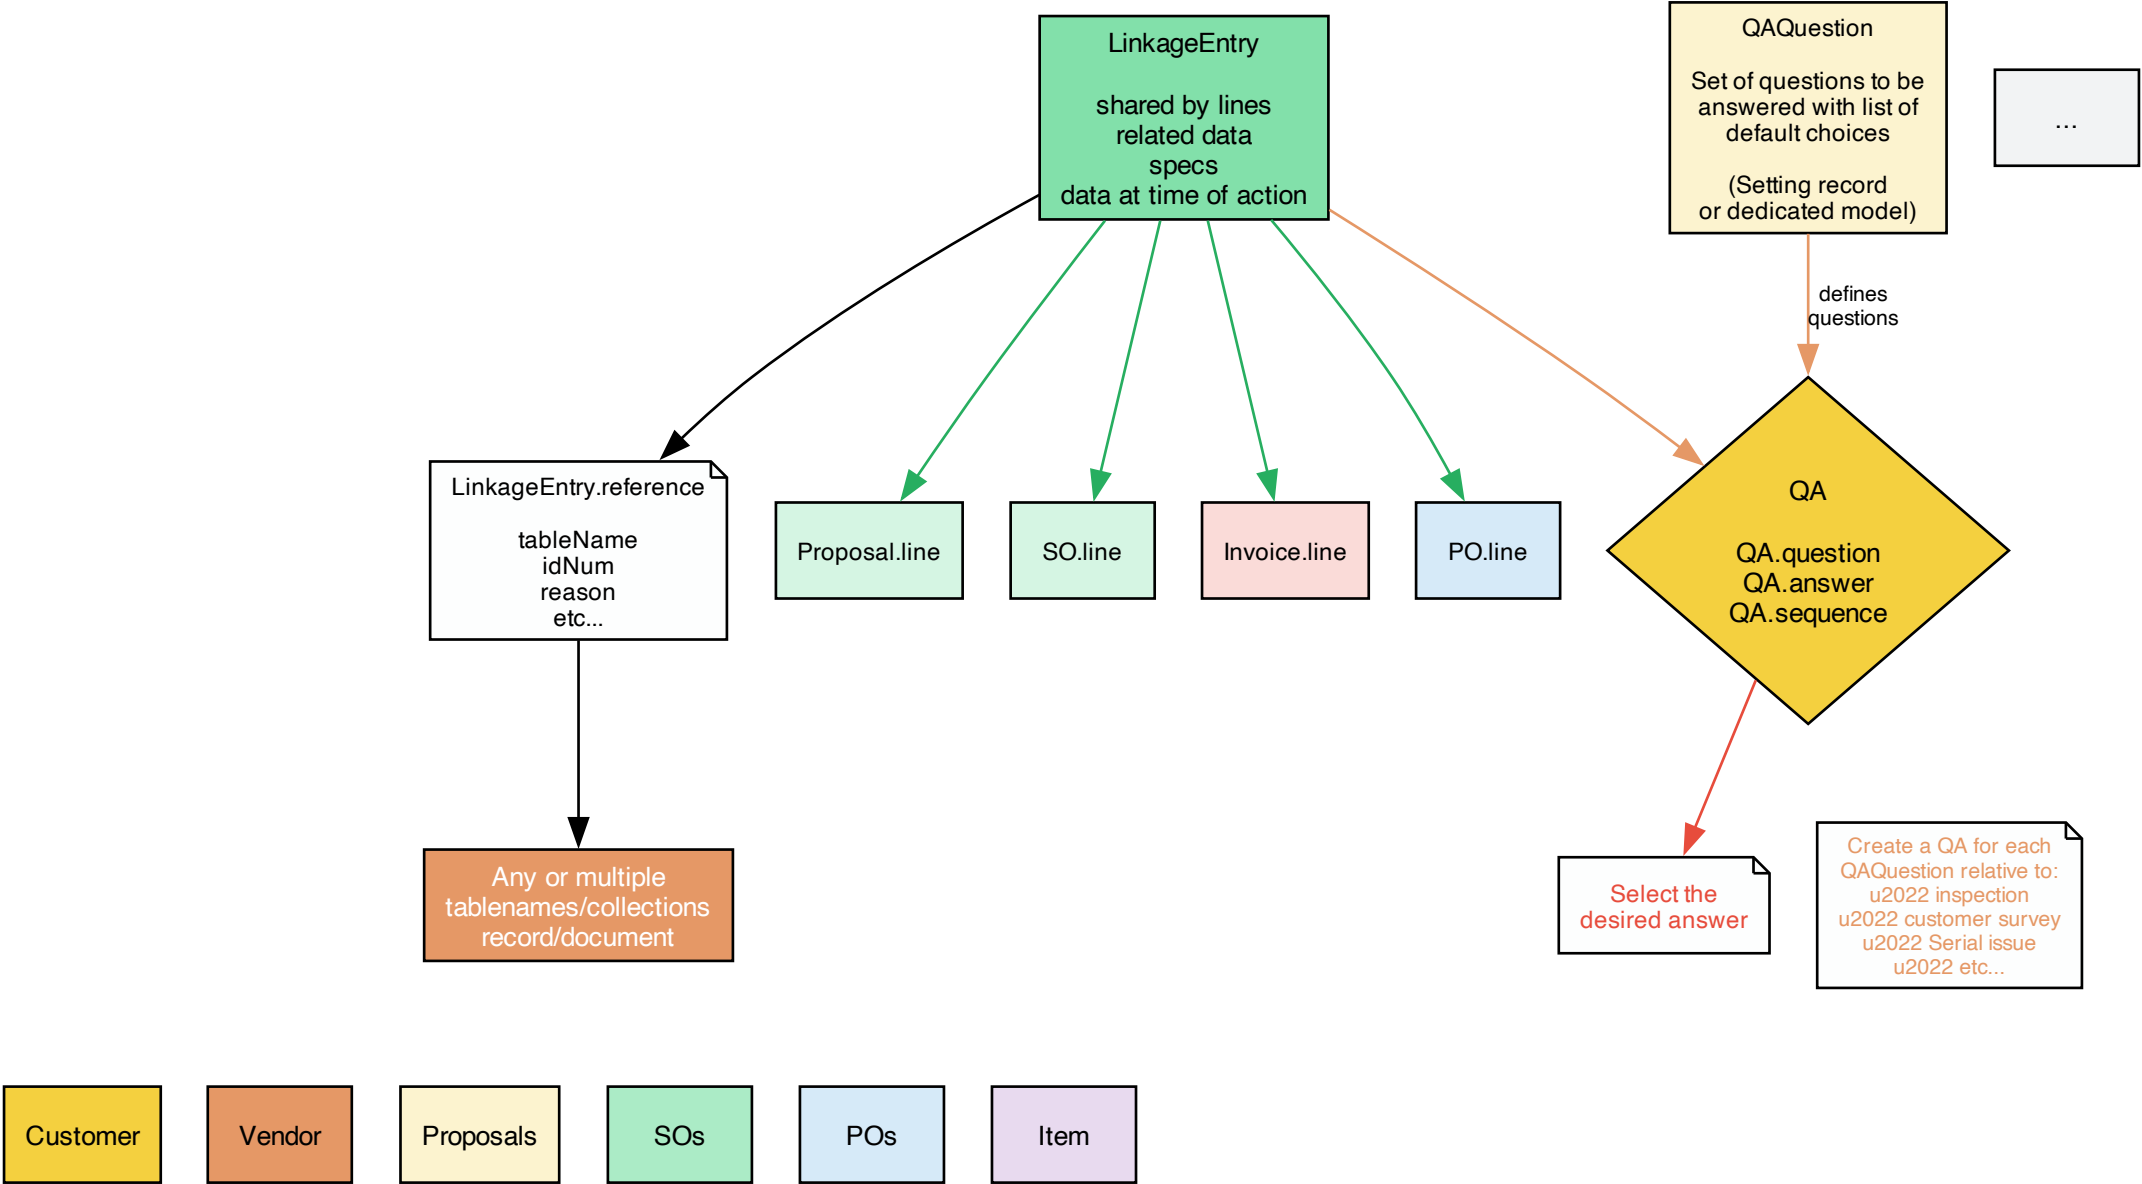

WC3 — Serial Number Tracking
(wc2: ItemSerials → wc3: Serial + SerialLog)

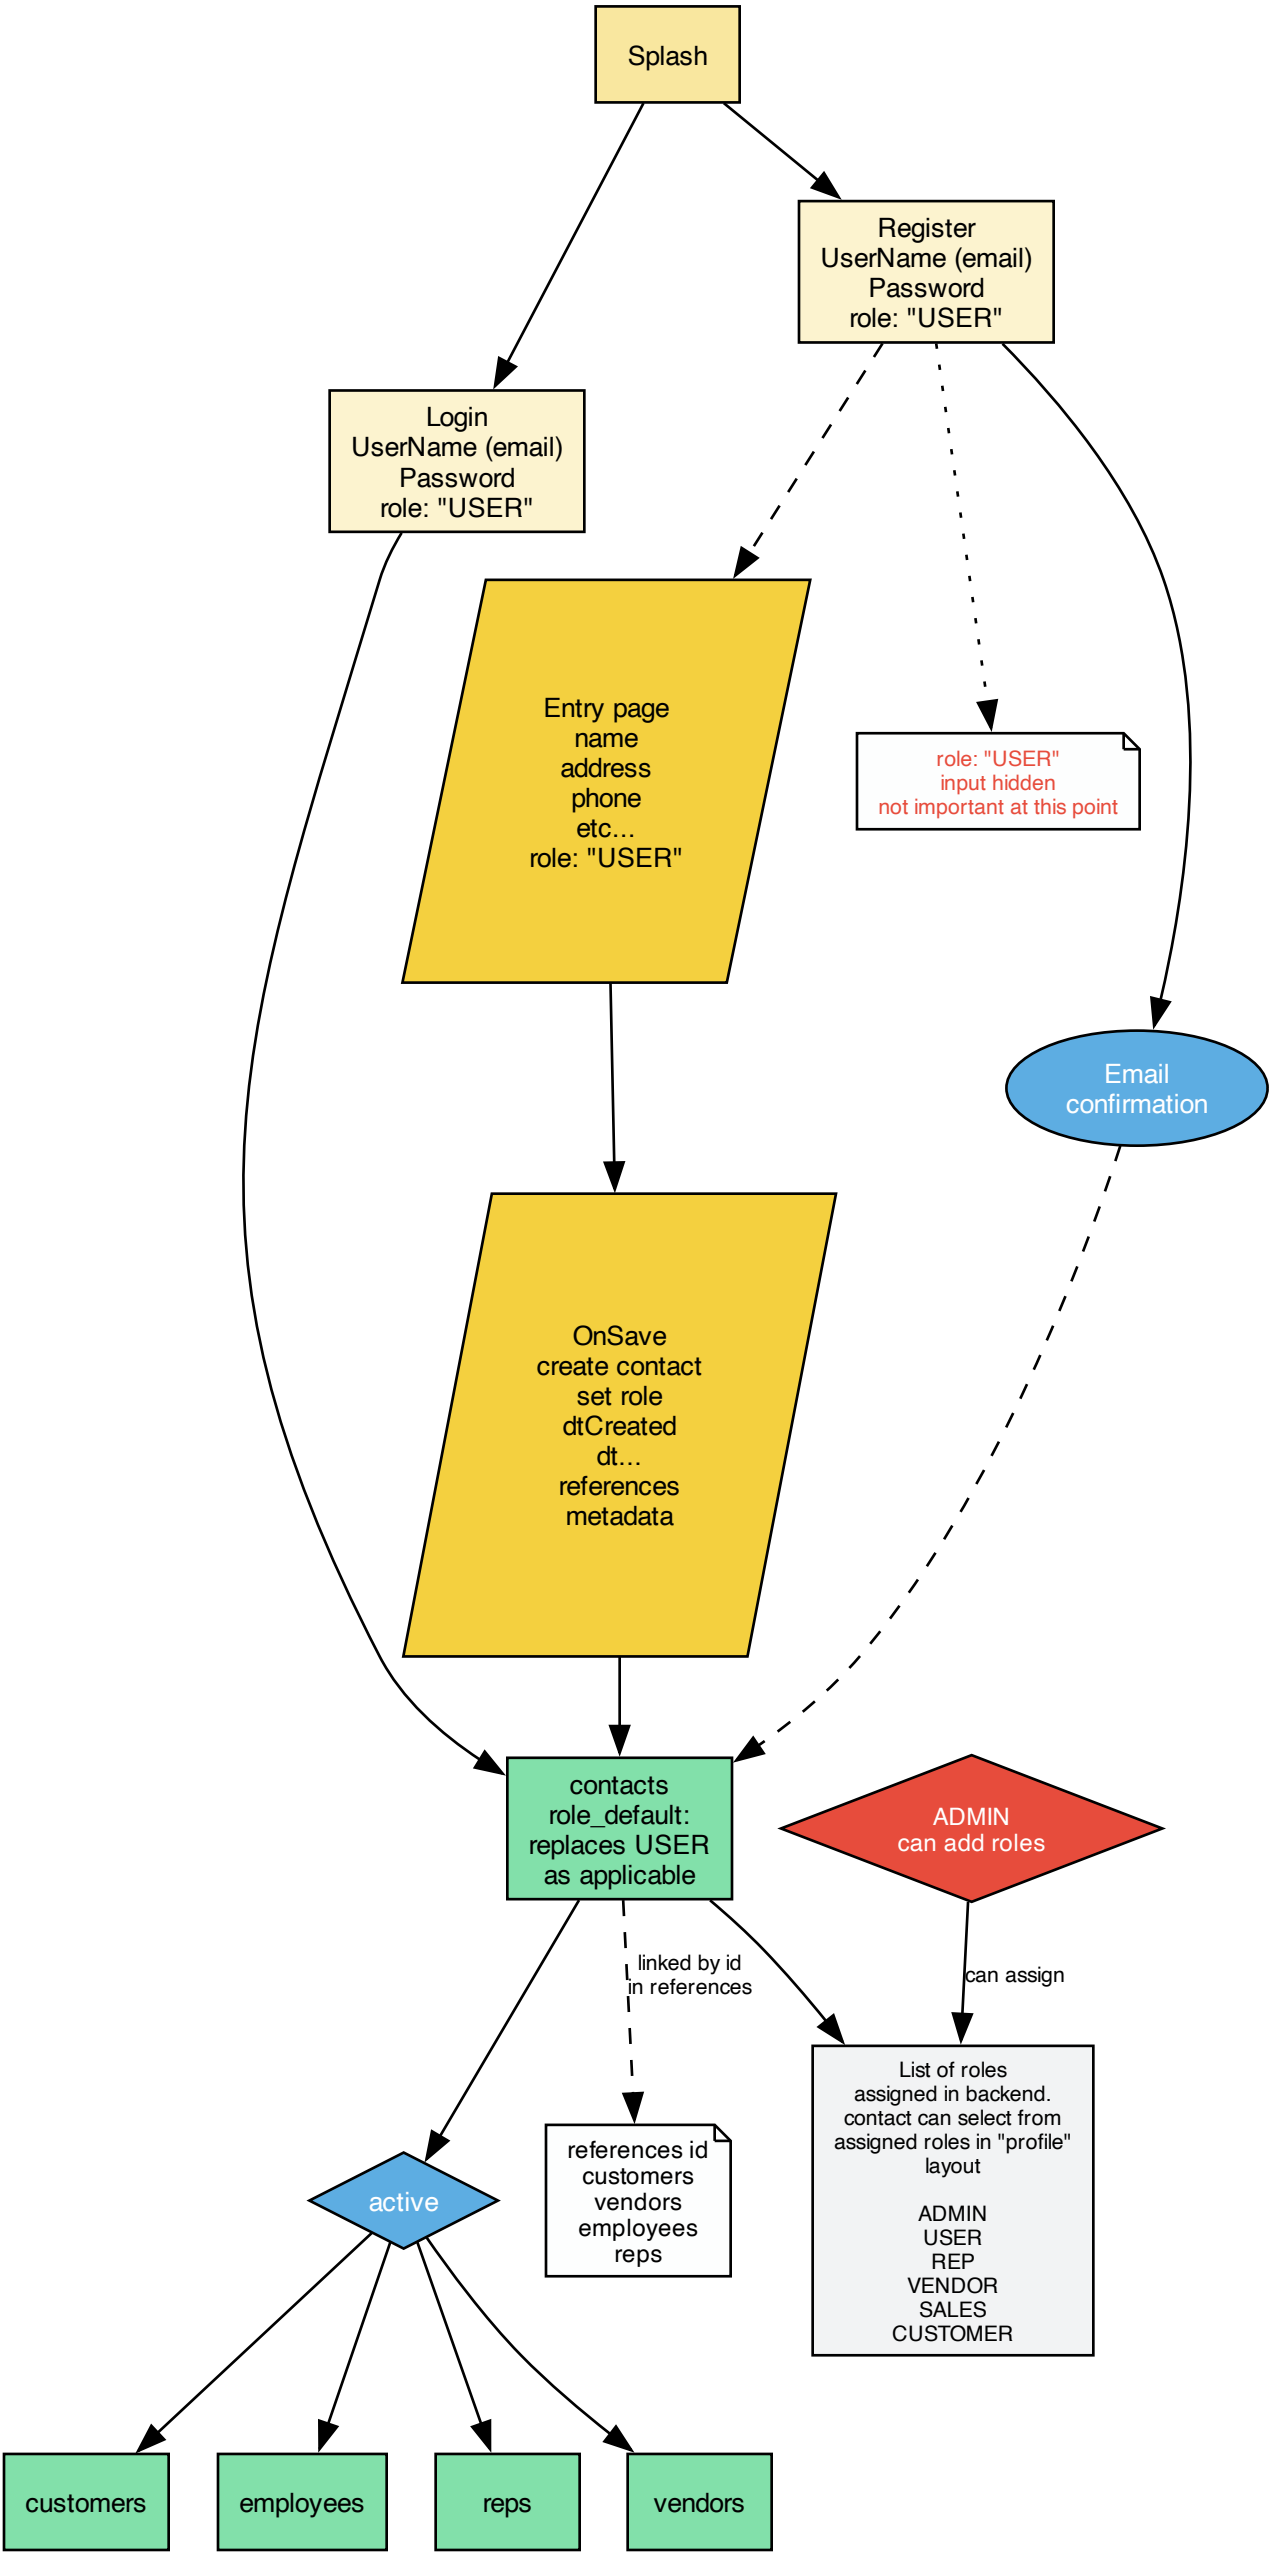

WC3 — Print System
Cmd+P = Primary | Print Button / Cmd+Opt+P = Report Selector

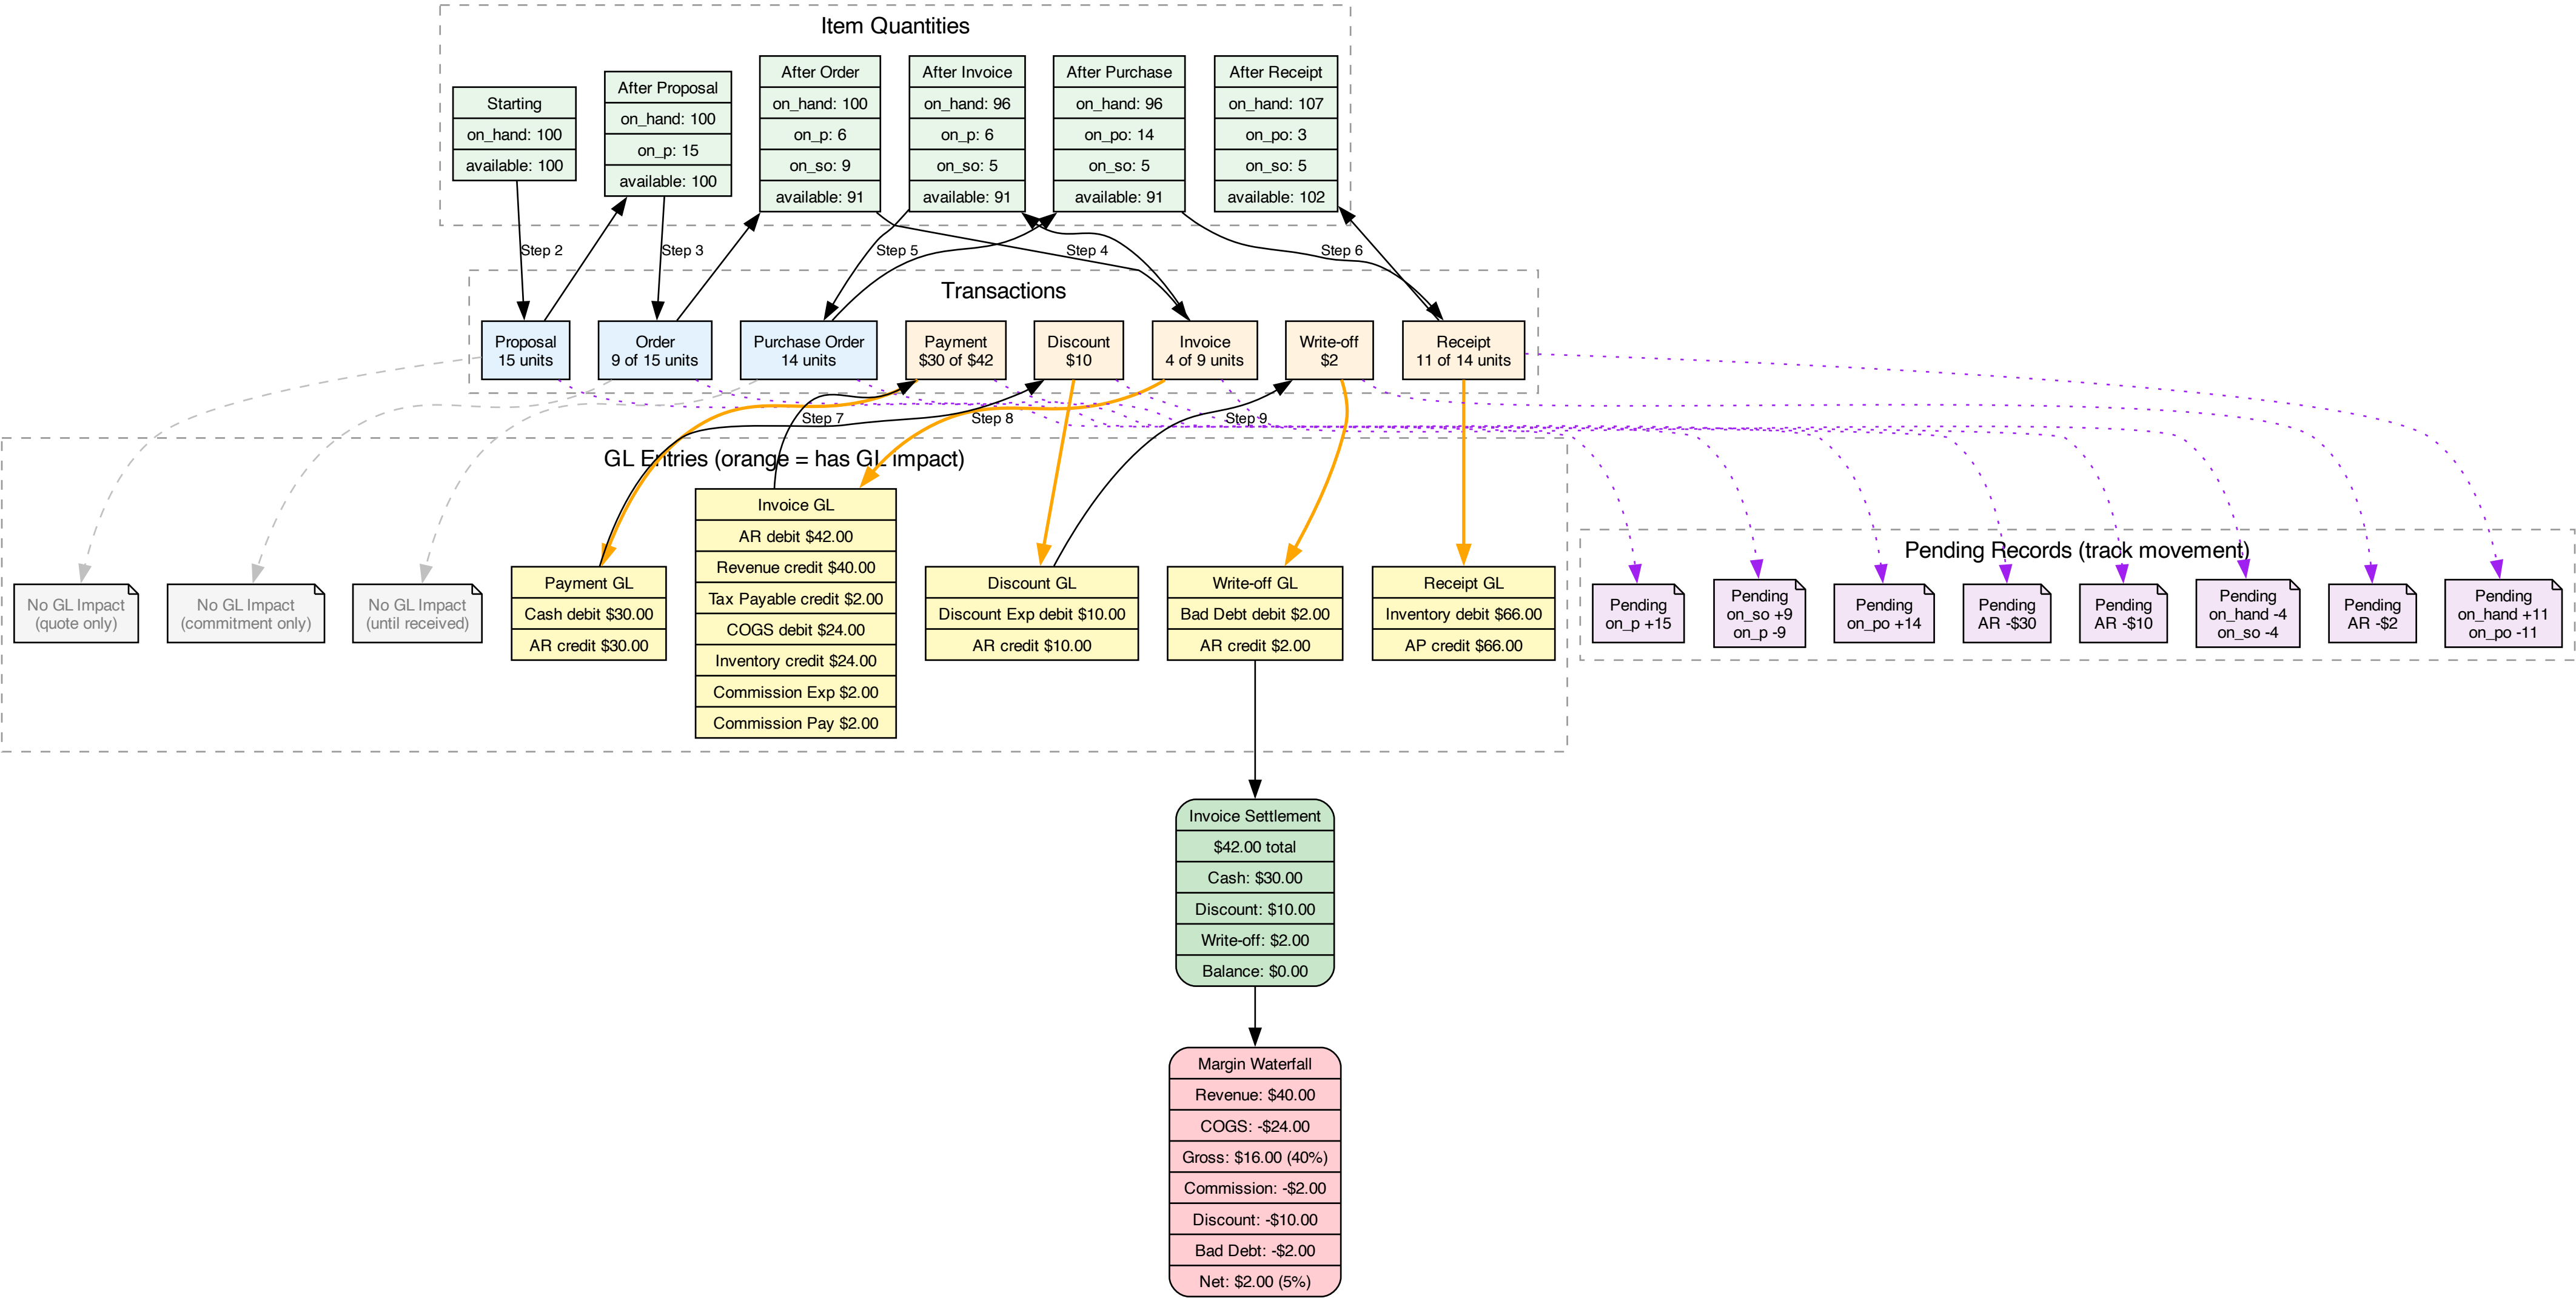

WC3 — QA Entity
Quality inspection, surveys, customer feedback

WC3 — Sign-in / Register Flow
Roles: ADMIN, USER, REP, VENDOR, SALES, CUSTOMER

Flight Simulator: Inventory
Transaction Flow with GL Impact
5% Tax · 5% Commission · Unit Price \$10 · Unit Cost \$6

Impact Assessment Loop

Alice guesses → User corrects → Alice learns → Admin time drops
